1 Introduction

This report presents the progress and outcomes under Deliverable 3 of the Tax Expenditures Tracking System (TaxETS) project, as specified in the Advisory Services Agreement between the Ministry of Finance (MoF) and APIS Co. Ltd. The implementation of this deliverable marks a major milestone in the system's development: the core development and the interface of the TaxETS platform.

This report builds on the foundation laid in the Inception Report (Deliverable 1) and the Blueprint Report (Deliverable 2), focusing primarily on system features and implementation progress. Notably, this report also explains a key change in the implementation strategy concerning the live integration with external databases.

2 Background and Objective

As part of the National Planning and Financing for Inclusive Development (NPFID) project, the TaxETS is designed to strengthen the MOF's capacity to monitor, record, and evaluate tax expenditures and non-tax incentives in a structured and transparent manner. The objective is to create a sustainable digital system that consolidates tax-related data, estimates revenue foregone, supports decision-making, and contributes to tax reform.

Deliverable 3 focuses on developing the system with a functional user interface, backend logic, core features, and reporting capabilities.

As outlined in our project proposal as well as in inception report, Deliverable 3 is to:

Develop the System with user interface that is linked with other databases / systems after the blueprint has been validated by the Ministry of Finance and relevant entities:

- After the design is accepted, the supplier needs to have a plan to arrange personnel to perform the initial work of creating the database according to the design. This plan needs to be sent to MOF and approved. The result of this work will be the system's main structural database.
- Build all functions / procedures / packages / SQL templates that process data inside and outside the database management system. These are the functions of the system backend.
- Build user interfaces. These interfaces need to be designed so that they are user friendly, interface friendly, easily to new users; quick access to normal users. Template reports are neatly designed and optimized for printing.
- Have a detailed connection plan using API with all external data sources. After the API connection to outside system, the data encryption should be applied; obscure sensitive information (allow display / no display / minimal display): name, address, password, personal information, tax amount, tax type

3 Key Implementation Change

Originally, the project aimed for **live system integration** with key external systems including:

- ASYCUDA (Customs data)

- TaxRIS (Tax Revenue Information System)
- MPI and MOIC systems (Investment licensing and monitoring)

However, during the implementation phase, it became clear that real-time integration is not currently feasible for the following reasons:

1. **Coordination Challenges:** Integration requires multi-level approval and cooperation between ministries. Despite technical feasibility, such coordination is difficult to achieve within the project timeframe.
2. **Data System Readiness:** Many ministries do not yet maintain a standardized digital system. Some rely on raw data or Excel files, and others lack up-to-date or structured datasets.

New Implementation Direction:

- Manual Data Input Module
- Excel/CSV Import Functionality (using predefined templates)
- Future Integration-Ready Architecture

This change was reviewed and approved by the FPD and UNDP, and the system remains compliant with the long-term vision of the project.

4 Core Functional Modules Developed

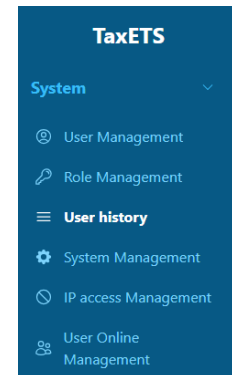

The following core modules have been successfully developed and configured in this phase:

1. System
2. Data Dictionary
3. Get Tax Data by Import from Excel
4. Get Tax Data by API
5. Run Tax Expenditure
6. Report
7. Notification

Detail explanation for each module will be outlined in this document below.

4.1 System

The System module allows to manage system resources such as: user account, white list / black list of IP address access, manage parameters for Notifications / send email / and other system parameters

4.1.1 User Management

This function allows to create, update, delete any user in the system, as the screen shown below:

User Management

4.1.2 Role Management

This function allows to create, update, delete any user role in the system. At the same time, it allows to assign access rights to functions or revoke access rights to functions. The role can be like, Super Admin, UNDP Team, Accounting, Staff, etc.

Within a role Super Admin can define, the user having this role can Create, Read, Update and Delete module in the system:

← → ↻ Not secure 34.27.243.31:8000/cms/role/01966093-b181-7130-a64e-42b524fd4816/edit

4.1.4 System Management

Function to manage system configuration and setup parameters. This function should only be used by system administrators or well-trained operators.

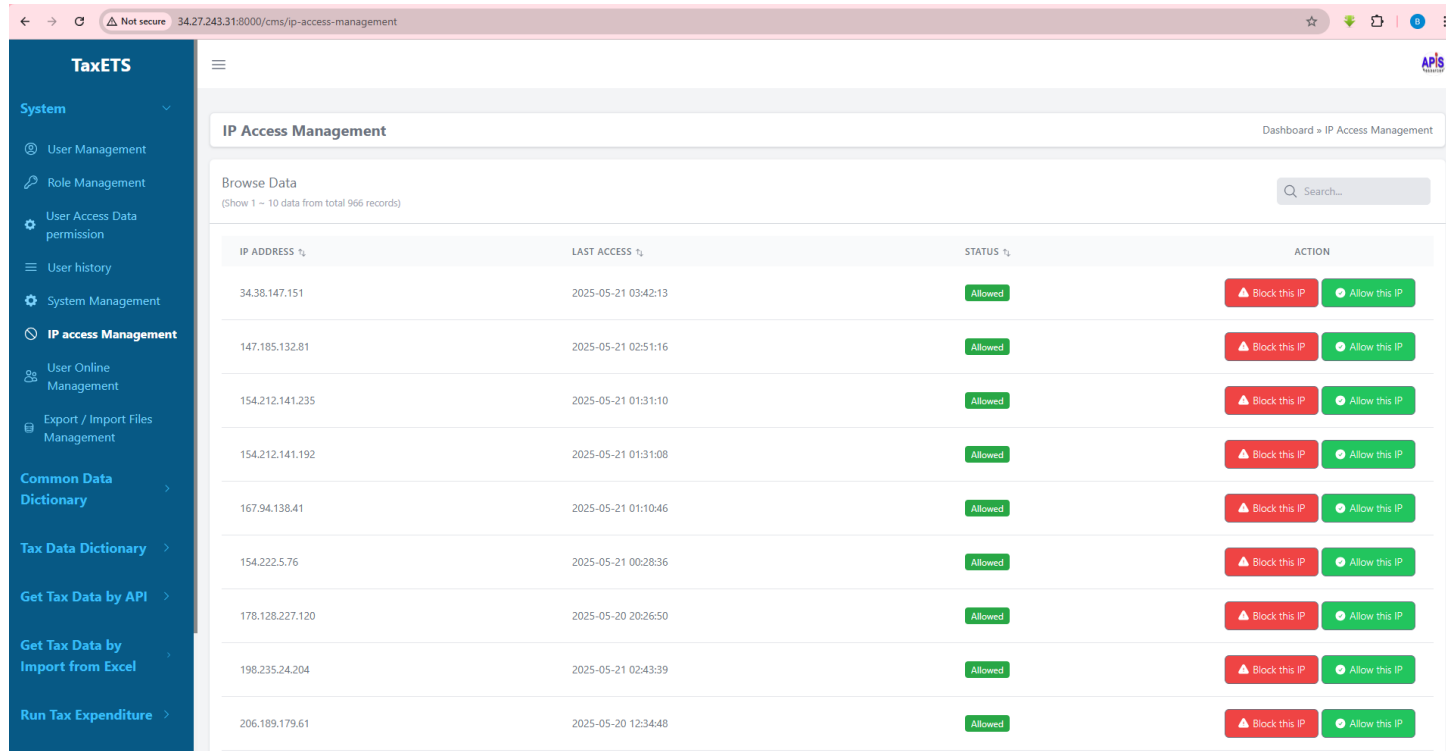

The screenshot displays the 'System Parameter' management interface within the TaxETS application. The left sidebar contains a navigation menu with the following items: System, User Management, Role Management, User Access Data permission, User history, System Management (highlighted), IP access Management, User Online Management, Export / Import Files Management, Common Data Dictionary, Tax Data Dictionary, Get Tax Data by API, Get Tax Data by Import from Excel, and Run Tax Expenditure. The main content area is titled 'System Parameter' and includes a 'Browse Data' section with a search bar and an 'Add New' button. Below this is a table with the following data:

ID	CODE	NAME	NAME ENGLISH	PARAM VALUE	ACTION
26	SMS_Gate_Way	34.27.243.31	34.27.243.31	1	[Eye] [Pencil] [Trash]
25	Email_Server_host	34.27.243.31	34.27.243.31	1	[Eye] [Pencil] [Trash]
24	Email_Send_other_Stackholder	Send email to Stackholder Relative after Run Tax Benchmark	Send email to Stackholder Relative after Run Tax Benchmark	1	[Eye] [Pencil] [Trash]
23	EMAIL_SEND	Send email to TIN Owner after Run Tax Benchmark	Send email to TIN Owner after Run Tax Benchmark	1	[Eye] [Pencil] [Trash]

The table indicates it is showing 1 to 4 data from a total of 4 records. At the bottom right of the table, it shows 'Items per page: 10'.

4.1.5 IP access Management

Function to manage lists of IP addresses that are allowed and not allowed to access the system.

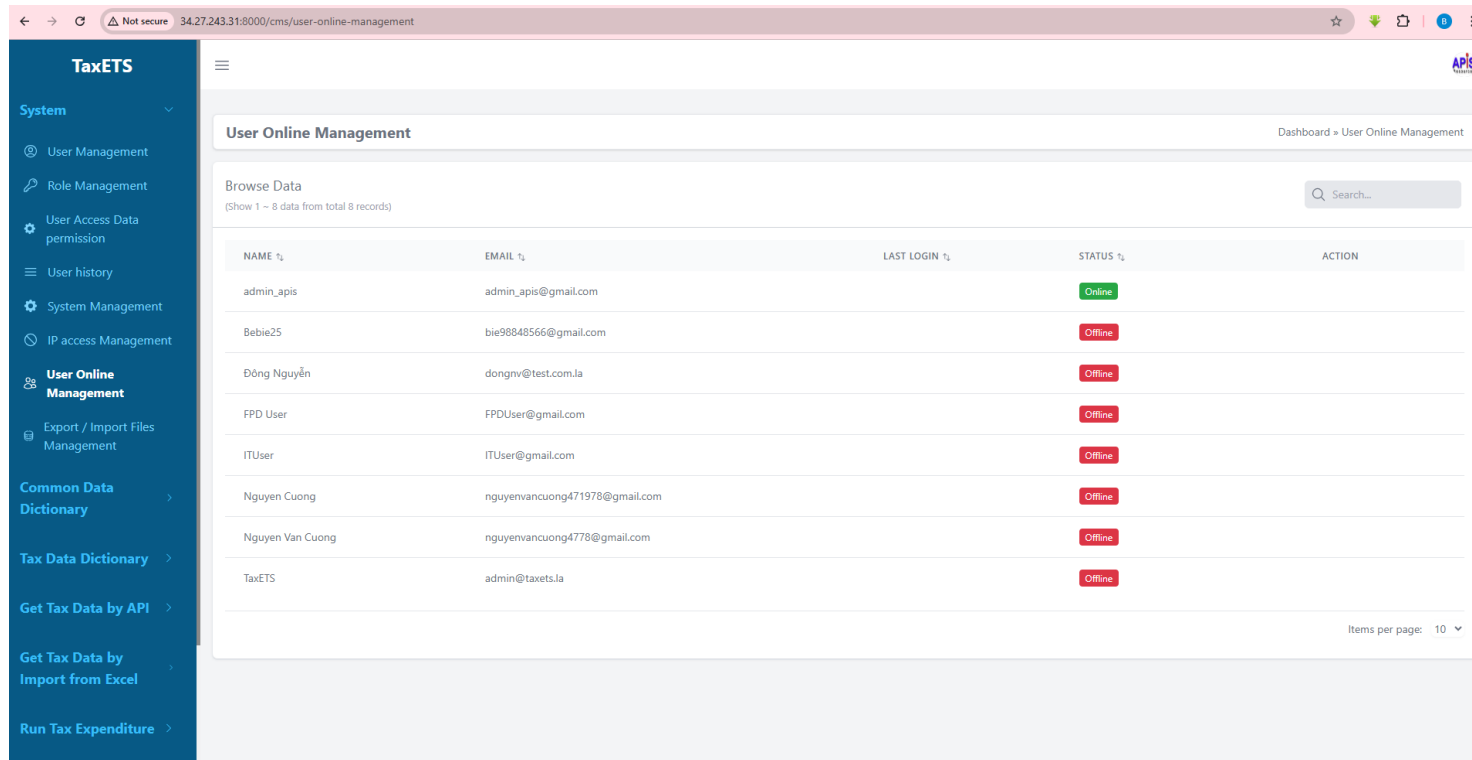

The screenshot displays the 'IP Access Management' interface within the TaxETS system. The left sidebar contains navigation links for System, User Management, Role Management, User Access Data permission, User history, System Management, IP access Management (selected), User Online Management, and Export / Import Files Management. The main content area shows a table of IP addresses with columns for IP ADDRESS, LAST ACCESS, STATUS, and ACTION. The table lists 10 IP addresses, all with a status of 'Allowed'. The ACTION column for each row contains two buttons: 'Block this IP' (red) and 'Allow this IP' (green).

IP ADDRESS	LAST ACCESS	STATUS	ACTION
34.38.147.151	2025-05-21 03:42:13	Allowed	Block this IP / Allow this IP
147.185.132.81	2025-05-21 02:51:16	Allowed	Block this IP / Allow this IP
154.212.141.235	2025-05-21 01:31:10	Allowed	Block this IP / Allow this IP

167.94.138.41	2025-05-21 01:10:46	Allowed	Block this IP / Allow this IP
154.222.5.76	2025-05-21 00:28:36	Allowed	Block this IP / Allow this IP
178.128.227.120	2025-05-20 20:26:50	Allowed	Block this IP / Allow this IP
198.235.24.204	2025-05-21 02:43:39	Allowed	Block this IP / Allow this IP
206.189.179.61	2025-05-20 12:34:48	Allowed	Block this IP / Allow this IP

4.1.6 User Online Management

This function allow to show who are online currently.

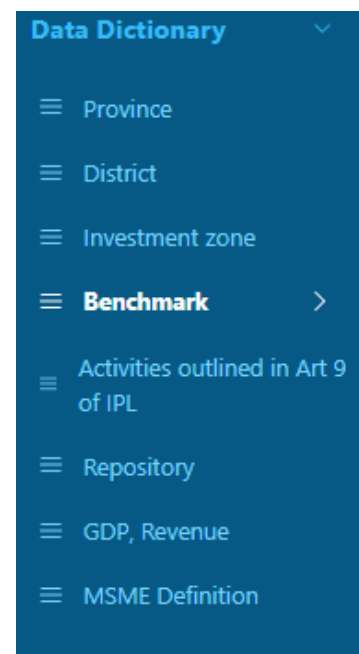

The screenshot displays the 'User Online Management' page in the TaxETS system. The page features a sidebar with navigation options and a main content area with a table of users. The table has columns for NAME, EMAIL, LAST LOGIN, STATUS, and ACTION. The STATUS column shows 'Online' for the 'admin_apis' user and 'Offline' for all other users. The interface also includes a search bar and a pagination control at the bottom right.

NAME	EMAIL	LAST LOGIN	STATUS	ACTION
admin_apis	admin_apis@gmail.com		Online	
Bebie25	bie98848566@gmail.com		Offline	
Đông Nguyễn	dongnv@test.com.la		Offline

4.2.4 Benchmark

Manage data of Benchmark categories defined by Law and Regulation Documents

4.2.4.1 Corporate Income Tax

Manage Benchmark data on Corporate Income Tax, allowing adding, editing, deleting benchmark for different kind of businesses.

The screenshot displays the TaxETS web application interface. On the left is a dark blue sidebar with a menu containing categories like System, Data Dictionary, and Benchmark. The main content area is titled 'Enterprise Income Tax' and features a table with benchmark data. The table has columns for Tax Unit, Tax Base, Tax Period, and Tax Rate. The Tax Rate section is further divided into Profit Tax, Mandatory Income Tax, and Micro Enterprise Income Tax. The table lists various tax rates and their corresponding actions (edit, delete).

Tax Unit	Tax Base	Tax Period	Tax Rate							
			Profit Tax		Mandatory Income Tax		Micro Enterprise Income Tax			
			Rate Tax	Actions	Rate Tax	Actions	Annual Turnover	Agriculture, industry, manufacturing	Commerce	Services
- a business enterprise, including the self-employed as defined in Art. 3.10	annual business income - annual deductible expenses + unallowable expense	1 year	20% Standard PT Rate	 	7% Agriculture and handicraft	 	≤ LAK50m	0%	0%	0%
			22% Tobacco companies	 	10% Industry and manufacturing	 	LAK50m to LAK400m	1%	3%	3%
			35% Companies engaged in mining activities	 	15% Commerce and service	 				
				 	30% Electricity, power, and mining	 				

4.2.4.2 Individual Income Tax

Manage Benchmark data on Individual Income Tax, allowing adding, editing, deleting benchmark for different kind of Individual Income.

4.2.4.3 Value Added Tax

Manage Benchmark data on Value Added Tax, allowing adding, editing, deleting benchmark for different kind of Value Added Tax.

The screenshot shows the 'Value-Added Tax' section of the TaxETS application. The left sidebar contains a navigation menu with categories like System, Data Dictionary, and Benchmark. The main area displays a table of benchmark data. The table has five columns: Tax Unit, Tax Base, Tax Period, Tax Type, and Actions. There are two rows of data. The first row describes a benchmark VAT rate of 7% in Laos, and the second row describes a 0% VAT rate for exports. Each row has edit and delete icons in the Actions column.

Tax Unit	Tax Base	Tax Period	Tax Type	Actions
Individual, legal entity or organization that operates a business under the VAT system	Defined in Article 11 of the VAT Law	Monthly basis	The benchmark VAT rate in Laos is currently 7% (entered into force from 01 January 2022)	
			Export of goods and export of processed natural resources are charged VAT at 0%	

4.2.4.4 Custom Duty

Manage data on Custom Duty, allowing adding, editing, deleting duty information depending on the category of the product.

4.2.4.6 Non Tax

The Non Tax is classified to Land Concession and Natural Resource Compensation. User can expand to see the detail for each part. As the image below, use expands to see the Benchmark of Compensation for different kind of Natural Resource. User can do the same for Land Concession.

This part is not yet editable in this version since the change can happen not in the near future. However, the final version, we will add feature to edit it for long-term usability.

L/D	Mineral type	Percentage of sales value of mined mineral products
1	Gemstones and gemstones - diamonds, rubies, sapphires, emeralds, - gemstones	10
	Semi-precious stones - agate, alexandrite	
2	- Aerolite, Hordeolite, Pyrite, Beryl, Spinel, Topaz, Kitzorite, Opal, Tourmaline, Agate, Garnet:	7
	Quartz, Amethyst	
3	Precious metals: silver, gold, platinum	7
4	Base metals (non-ferrous metals) - copper, lead, tin, zinc, aluminum	6
5	Steel and steel alloys: steel, titanium, manganese, chromium, vanadium, nickel, cobalt, molybdenum, stainless	5

4.2.5 Activities outlined in Art 9 of IPL

Manage data on Activities outlined in Art 9 of IPL, allowing adding, editing, deleting record for Activities outlined in Art 9 of IPL.

The screenshot shows a web application interface for managing data. The browser address bar indicates the URL is 34.27.243.31:8000/cms/project-investment-licence. The application has a dark blue sidebar with a 'Data Dictionary' menu. The main content area is titled 'Activities outlined in Art 9 of IPL' and includes a search bar, an 'Add New' button, and a table with one record. The table has columns for ID, PROJECT ID, SHORT NAME, SHORT NAME EN, CONTENT, MORE INFO, TAX RULE, and ACTION. The record shows ID 1, PROJECT ID 0123rr, SHORT NAME P1213, SHORT NAME EN 12323, CONTENT 12323, and MORE INFO 1223. The ACTION column contains three icons: a blue eye, a blue pencil, and a red trash can. The bottom right of the table area shows 'Items per page: 10'.

4.2.6 Repository

Manage data on Activities outlined in Repository: Tax Relief, Exemption or Deduction for , allowing adding, editing, deleting record for Repository Article. There is dropdown for user to filter and work with a certain type of Tax, such as: Profit Tax, Individual Tax, VAT, Excise Tax, Custom Duty and Non-Tax Fee.

The screenshot shows the TaxETS web application interface. On the left is a dark blue sidebar with navigation links: System, Data Dictionary, Province, District, Investment zone, Benchmark, Activities outlined in Art 9 of IPL, Repository (selected), GDP, Revenue, MSME Definition, Get Tax Data by Import from Excel, Get Tax Data by API, Run Tax Expenditure, Report, and Notifications. The main content area is titled 'Repository' and includes a 'Browse Data' section with a search bar and a 'Tax Type' dropdown set to 'All'. Below this is a table with 10 columns: ID, RULE CODE, RULE SHORT NAME, DESCRIPTION, DOCUMENT REFERENCE, PERIOD TIME, TAX TYPE, ENABLED, and ACTION. The table contains 16 rows of data, including various exemptions and rate reliefs for different sectors and conditions.

ID	RULE CODE	RULE SHORT NAME	DESCRIPTION	DOCUMENT REFERENCE	PERIOD TIME	TAX TYPE	ENABLED	ACTION
1	1	Rate Relief--ITL Art. (amended) 16(2)	A newly registered small entity (6-50 staff, total assets not exceeding LAK1.5 billion, & annual turnover ≤ LAK3 billion) is subject to a profit tax rate of 3% for 3 years, after which the standard PT rate applies.	ITL (amended)	36	Profit Tax	Active / Enable	[Edit] [Add] [Delete]
10	10_1	Exemption--IPL Art. 15	Investors investing in sectors as specified in Art. 9 of the law on investment promotion will receive exemption from rental or concession royalty of state land as follows: Zone 1: exemption for ten years; for investment in sectors as specified in points 2, 3, 5 and 6 of Art. 9 of the Law on Investment Promotion will receive additional five years of such exemption;	IPL	120	Non-Tax Fee		[Edit] [Add] [Delete]
128	10_2	Exemption--IPL Art. 15	Investors investing in sectors as specified in Art. 9 of the law on investment promotion will receive exemption from rental or concession royalty of state land as follows: Zone 1: exemption for ten years; for investment in sectors as specified in points 2, 3, 5 and 6 of Art. 9 of the Law on Investment Promotion will receive additional five years of such exemption;	IPL	36	Non-Tax Fee		[Edit] [Add] [Delete]
11	11_1	Exemption--IPL Art. 15	Investors investing in sectors as specified in Art. 9 of the law on investment promotion will receive exemption from rental or concession royalty of state land as follows: Zone 2: receive exemption for five years; for investment in sectors as specified in points 2, 3, 5 and 6 of Article 9 herein will receive additional three years of such exemption;	IPL	60	Non-Tax Fee		[Edit] [Add] [Delete]
129	11_2	Exemption--IPL Art. 15	Investors investing in sectors as specified in Art. 9 of the law on investment promotion will receive exemption from rental or concession royalty of state land as follows: Zone 2: receive exemption for five years; for investment in sectors as specified in points 2, 3, 5 and 6 of Article 9 herein will receive additional three years of such exemption;	IPL	36	Non-Tax Fee		[Edit] [Add] [Delete]
12	12	Exemption--SEZ Article 40; IPL Art. 62	SEZ Developers: Production industry, services on tourism industry development, services in public health, education, sport and physical activity, and real estate development shall receive profit tax incentives according to zones as follows: Zone 1: exempted from profit tax for sixteen years.	SEZ Article	192	Profit Tax	Active / Enable	[Edit] [Add] [Delete]
130	13	Exemption--SEZ Article 40; IPL Art. 62	SEZ Developers: Production industry, services on tourism industry development, services in public health, education, sport and physical activity, and real estate development shall receive profit tax incentives according to zones as follows: Zone 1: exempted from profit tax for sixteen years.	SEZ Article	60	Profit Tax		[Edit] [Add] [Delete]
14	14	Exemption--SEZ Article 40; IPL Art. 62	SEZ Developers Production industry, services on tourism industry development, services in public health, education, sport and physical activity, and real estate development shall receive profit tax incentives according to zones as follows: Zone 2: exempted from profit tax for eight years.	SEZ Article	96	Profit Tax	Active / Enable	[Edit] [Add] [Delete]
15	15	Rate Relief--SEZ Article 40; IPL Art. 62	Upon the expiration of the exemption period, Zone Developers in Zone 2 shall pay profit tax at thirty-five percent (35%) of profit tax rate as specified in the Tax Law for the five years, and thereafter pay according to the rates set in the Tax Law.	SEZ Article	60	Profit Tax	Active / Enable	[Edit] [Add] [Delete]
16	16_1	Exemption--SEZ Article 43; IPL Art. 9	Zone Investors in sectors specified in the Article 9 of Law on Investment Promotion shall be exempted from profit tax for additional five years from the date the exemption period or additional five years from the date of the expiration of the exemption period.	SEZ Article	24	Profit Tax	Active / Enable	[Edit] [Add] [Delete]

4.2.7 GDP, Revenue

Manage data on GDP for a year, allowing adding, editing, deleting record for GDP for each year.

The screenshot shows the TaxETS web application interface for managing GDP, Revenue data. The browser address bar indicates the URL is 34.27.243.31:8000/cms/gdp-value. The sidebar on the left contains the following navigation items: System, Data Dictionary, Province, District, Investment zone, Benchmark, Activities outlined in Art 9 of IPL, Repository, GDP, Revenue (highlighted), and MSME Definition. The main content area is titled 'GDP, Revenue' and shows a 'Browse Data' section with a search bar and buttons for 'Add New' and 'Import'. Below this is a table with 4 records of GDP data for the years 2019 to 2022. The table has columns for NO, GDP YEAR, GDP VALUE, REVENUE VALUE, and NOTE. Each record has an ACTION column with icons for view, edit, and delete. The interface also includes a pagination control at the bottom right showing 'Items per page: 10'.

NO	GDP YEAR	GDP VALUE	REVENUE VALUE	NOTE	ACTION
4	2022	217,350.48 billions	1,000		
3	2021	180,751.08 billions	789		
2	2020	167,668.97 billions	456		
1	2019	163,080.40 billions	123		

4.2.8 MSME Definition

Show MSME Definition classifying to Micro, Small and Medium and its condition such as Number of Employees, Annual Turnover and Total Asset for different sector, like: Production of commercial goods, Service and Trade.

The interface allow user to Add New, Edit and Delete the MSME record.

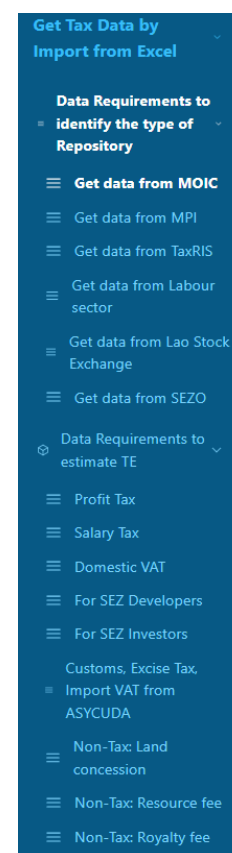

The screenshot displays the TaxETS MSME Definition interface. The left sidebar contains navigation options: System, Data Dictionary, Province, District, Investment zone, Benchmark, Activities outlined in Art 9 of IPL, Repository, GDP, Revenue, MSME Definition, Get Tax Data by Import from Excel, Get Tax Data by API, and Run Tax Expenditure. The main content area is titled 'MSME Definition' and includes a '+ Create New' button. Below the title, there is a filter for 'Effective Date' with a range from '01/01/2017' to '02/06/2025'. The table below shows the following data:

Effective Date	Sector Name	Item Name	Micro	Small	Medium	Actions
16/01/2017	Production of commercial goods	Annual average number of employees	1-5	6-50	51-99	[Edit] [Delete]
		Annual average number of employees	0-5	6-50	51-99	[Edit] [Delete]
		Annual turnover (KN)	Not exceeding 400,000,000	Not exceeding 2,000,000,000	Not exceeding 4,000,000,000	[Edit] [Delete]
		Annual turnover (KN)	Not exceeding 400,000,000	Not exceeding 2,000,000,000	Not exceeding 4,000,000,000	[Edit] [Delete]
		Total assets (KN)	Not exceeding 100,000,000	Not exceeding 1,000,000,000	Not exceeding 4,000,000,000	[Edit] [Delete]
		Total assets (KN)	Not exceeding 100,000,000	Not exceeding 1,000,000,000	Not exceeding 4,000,000,000	[Edit] [Delete]
		Annual average number of employees	1-5	6-50	51-99	[Edit] [Delete]
		Annual average number of employees	1-5	6-50	51-99	[Edit] [Delete]
		Annual turnover (KN)	Not exceeding 400,000,000	Not exceeding 1,500,000,000	Not exceeding 6,000,000,000	[Edit] [Delete]

4.3 Get Tax Data by Import from Excel

This module provides tools to import MS Excel data from all relevant stakeholders, such as MOIC, MPI, TaxRIS, MLSF, Lao Stock Exchange, SEZO, TaxRIS, ASYCUDA, etc.

For each submodule or stakeholder, the MS Excel template is provided, so that the data required is correctly and fully present in the file.

4.3.1 Data Requirements to Identify the type of Repository

4.3.1.1 Get data from MOIC

Here below is the interface to import Enterprise Information in MS Excel format from MOIC, as well as View, Edit and Delete a certain selected record.

4.3.1.4 Get data from Ministry of Labo and Social Welfare (MoLSW)

Here below is the interface to import individual revenue information in MS Excel format from Ministry of Labor and Social Welfare, as well as View, Edit and Delete a certain selected record.

The screenshot displays the TaxETS web application interface. On the left is a dark blue sidebar with the 'TaxETS' logo at the top. Below the logo are several menu items: 'System', 'Data Dictionary', 'Get Tax Data by Import from Excel', 'Data Requirements to identify the type of Repository', and 'Data Requirements to estimate TE'. The 'Get Tax Data by Import from Excel' menu is expanded, showing sub-options: 'Get data from MOIC', 'Get data from MPI', 'Get data from TaxRIS', 'Get Data from MOLSW' (which is highlighted), 'Get data from Lao Stock Exchange', and 'Get data from SEZO'. The main content area is titled 'Get Data from MOLSW' and includes a breadcrumb trail 'Dashboard » Get Data from MOLSW'. Below the title is a 'Browse Data' section with a search bar and an 'Add New' button. A table displays one record with the following columns: 'NO %', 'TIN %', 'NUMBERS OF STAFF %', 'YEAR DATA %', and 'ACTION'. The table contains one row with the values: 1, 010-00000005, 111, 2025, and a set of three icons (eye, pencil, and trash). At the bottom right of the table, it says 'Items per page: 10'.

NO %	TIN %	NUMBERS OF STAFF %	YEAR DATA %	ACTION
1	010-00000005	111	2025	  

4.3.1.5 Get data from Lao Stock Exchange Companies

Here below is the interface to import Enterprise information that registered in Lao Stock Exchange in MS Excel format, as well as View, Edit and Delete a certain selected record.

The screenshot displays the TaxETS web application interface. The browser address bar shows the URL: 34.27.243.31:8000/cms/lao-stockexchange-companies. The application has a dark blue sidebar with the following menu items: System, Data Dictionary, Get Tax Data by Import from Excel, Data Requirements to identify the type of Repository, Get data from MOIC, Get data from MPI, Get data from TaxRIS, Get Data from MOLSW, Get data from Lao Stock Exchange (highlighted), Get data from SEZO, and Data Requirements to estimate TE. The main content area is titled 'Lao StockExchange companies' and includes a breadcrumb 'Dashboard » Lao StockExchange companies'. Below the title is a 'Browse Data' section with a search bar and buttons for 'Add New' and 'Import'. A table displays one record with the following data:

IDS %	TIN %	DATE JOIN %	STATUS JOIN %	ACTION
123	123	2025-05-30 08:57:00	1	View Edit Delete

The table indicates 'Show 1 ~ 1 data from total 1 records'. At the bottom right of the table, it says 'Items per page: 10'.

4.3.1.6 Get data from SEZO

Here below is the interface to import Enterprise information that make investment or have project development in SEZO, as well as View, Edit and Delete a certain selected record.

The screenshot displays the 'SEZO Data' section of the TaxETS system. On the left is a dark blue sidebar with navigation links: 'System', 'Data Dictionary', 'Get Tax Data by Import from Excel', 'Data Requirements to Identify the type of Repository' (with sub-links for MOIC, MPI, TaxRIS, MOLSW, Lao Stock Exchange, and SEZO), and 'Data Requirements to estimate TE'. The main content area has a header 'SEZO Data' and a breadcrumb 'Dashboard > SEZO Data'. Below this is a 'Browse Data' section showing '(Show 1 - 1 data from total 1 records)'. It includes a search bar and 'Add New' and 'Import' buttons. A table lists the data with columns: NO, TIN, LICENSE DATE, PROVINCE, DISTRICT, SECTOR, MAIN BUSINESS CATEGORY, INVESTORS, STATUS, and ACTION. One record is shown with values: 1, 12312, 2025-05-30 00:00:00, 12, 12, 123, 123, 123, 1. The ACTION column contains icons for view, edit, and delete. At the bottom right, it says 'Items per page: 10'.

NO %	TIN %	LICENSE DATE %	PROVINCE %	DISTRICT %	SECTOR %	MAIN BUSINESS CATEGORY %	INVESTORS %	STATUS %	ACTION
1	12312	2025-05-30 00:00:00	12	12	123	123	123	1	

4.3.2 Data Requirements to estimate TE

4.3.2.1 Profit Tax

Here below is the interface to import data required for the calculation of Profit Tax TE. It also allows user to View, Edit and Delete a certain selected record.

TIN %	ZONE 1 %	ZONE 2 %	ZONE 3 %	PROVINCE %	DISTRICT %	SECTOR %	TE NO %	REVENUE %	EXPENSE %	PROFIT %	BENCHMARK PT RATE %	BENCHMARK PT X N %	PT TE %	CUSTOMS TE NO %	CUSTOMS TE %	VAT TE NO %	IMPORT VAT TE %	TOTAL %	ACTION
0000000000	0	1		Champasak	Pakse City	Agriculture	8	/	/	/	0.24	/	0	55	0	34	0	0	View Edit Delete
0000000000	0	1		Champasak	Pakse City	Agriculture	8	/	/	/	0.24	/	0	55	0	34	0	0	View Edit Delete

0000000000	0	1		Champasak	Pakse City	Agriculture	8	/	/	/	0.2	/	0	55	0	34	0	0	View Edit Delete
0000000000	0	1		Champasak		Agriculture	8	/	/	/	0.24	/	0	55	0	34	0	0	View Edit Delete
0000000000	0	1		Champasak		Agriculture	8	/	/	/	0.24	/	0	55	0	34	0	0	View Edit Delete

4.3.2.2 Salary Tax

Here below is the interface to import data required for the calculation of Salary Tax TE. It also allows user to View, Edit and Delete a certain selected record.

The screenshot displays the 'Salary Tax' section of the TaxETS system. On the left is a dark blue sidebar with a menu. The main content area has a light gray header with 'Salary Tax' and a breadcrumb 'Dashboard > Salary Tax'. Below the header is a 'Browse Data' section with a search bar and 'Add New' and 'Import' buttons. A table lists tax data with columns for NO, TIN, TAX YEAR, BARCODE, TAXABLE AMOUNT, EXEMPTED AMOUNT, TOTAL EMPLOYEES, TOTAL TAX AMOUNT, ADJUSTMENT AMOUNT, CARRYFORWARD AMOUNT, and ACTION. One record is shown with TIN 'que' and TAX YEAR '2025-05-30 00:00:00'. The ACTION column contains icons for edit, view, and delete. At the bottom right, it says 'Items per page: 10'.

NO %	TIN %	TAX YEAR %	BARCODE %	TAXABLE AMOUNT %	EXEMPTED AMOUNT %	TOTAL EMPLOYEES %	TOTAL TAX AMOUNT %	ADJUSTMENT AMOUNT %	CARRYFORWARD AMOUNT %	ACTION
1	que	2025-05-30 00:00:00								

4.3.2.3 Domestic VAT

Here below is the interface to import data required for the calculation of Domestic VAT TE. It also allows user to View, Edit and Delete a certain selected record.

The screenshot displays the 'Domestic VAT' section of the TaxETS system. The interface includes a sidebar with navigation options like 'System', 'Data Dictionary', and 'Get Tax Data by Import from Excel'. The main content area shows a 'Browse Data' section with a search bar and 'Add New' and 'Import' buttons. Below this is a table with columns for various tax-related fields and an 'ACTION' column. The table contains one record with the following data:

NO	TIN	FILING DATE	DESCRIPTION	DOMESTIC VAT EXEMPTED	DOMESTIC 0% VAT	ABROAD SEZ 0% VAT	DOMESTIC 7% VAT	ABROAD SEZ 7% VAT	TOTAL VAT COLLECTED	TOTAL DEDUCTIBLE VAT	TOTAL SALES VAT EXEMPTION	TOTAL	DEDUCTIBLE INPUT VAT	ACTION
1	123	2025-05-30												View Edit Delete

At the bottom right of the table, there is a dropdown menu for 'Items per page' set to 10.

4.3.2.4 For SEZ Developer

Here below is the interface to import Enterprise information that makes project development in SEZO. It also allows user to View, Edit and Delete a certain selected record.

4.3.2.6 Customs, Excise Tax, Import VAT from ASYCUDA

Here below is the interface to import Enterprise import and export information from ASYCUDA required for the calculation of TE for Customs Duty, Excise Tax, Import VAT. It also allows user to View, Edit and Delete a certain selected record.

The screenshot shows a web application interface for importing data from ASYCUDA. The left sidebar contains a menu with options like 'Data Requirements to estimate TE', 'Profit Tax', 'Salary Tax', 'Domestic VAT', 'For SEZ Developers', 'For SEZ Investors', 'Customs, Excise Tax, Import VAT from ASYCUDA', 'Non-Tax: Land concession', 'Non-Tax: Resource fee', and 'Non-Tax: Royalty fee'. The main content area is titled 'Customs, Excise Tax, Import VAT from ASYCUDA' and includes a 'Browse Data' section with a search bar and an 'Import' button. Below this is a table with 10 columns: NO, BORDER CODE, BORDER, TYPE OF CUSTOMS DECLARE, PROCESS TYPE, IMPORT DOCUMENT DATE, ASSESS DATE, TRYD RECEIPT DATE, TIN, and IMPORT/EX NAME. The table displays two records, 9998 and 9999, both with a BORDER CODE of R1C10 and a TYPE OF CUSTOMS DECLARE of IM. The IMPORT DOCUMENT DATE and ASSESS DATE are both 23/08/2022 and 28/08/2022 respectively. The TRYD RECEIPT DATE is 28/08/2022. The TIN is 580761167-900. The IMPORT/EX NAME is 'ບ/ສ ຊີໄນ-ອາໂປຕາສ ຈຳກັດ ໂພນລະເວີ ໄສດຖາ ນະຄອນຫລວງວຽງຈັນ'.

NO	BORDER CODE	BORDER	TYPE OF CUSTOMS DECLARE	PROCESS TYPE	IMPORT DOCUMENT DATE	ASSESS DATE	TRYD RECEIPT DATE	TIN	IMPORT/EX NAME
9999	R1C10	ດ່ານພາສີ ສາກົນບໍ່ ເລີ່ມ	IM	4000	23/08/2022	28/08/2022	28/08/2022	580761167-900	ບ/ສ ຊີໄນ-ອາໂປຕາສ ຈຳກັດ ໂພນລະເວີ ໄສດຖາ ນະຄອນຫລວງວຽງຈັນ
9998	R1C10	ດ່ານພາສີ ສາກົນບໍ່ ເລີ່ມ	IM	4000	23/08/2022	28/08/2022	28/08/2022	580761167-900	ບ/ສ ຊີໄນ-ອາໂປຕາສ ຈຳກັດ ໂພນລະເວີ ໄສດຖາ ນະຄອນຫລວງວຽງຈັນ

Since this table is quite wide, user need to scroll right until the end of right border in order to see the function for Add New, Edit and delete record as shown in below screen.

4.4 Get Tax Data by API

As mentioned earlier, this part cannot be implemented during this project timeline. However, we have prepared the necessary structure for accommodation of this feature for future implementation.

4.4.1 Get Data from ASYCUDA/TaxRIS/SEZ

4.4.1.1 Get Data from ASYCUDA

4.4.1.2 Get Data from Lao Stock Exchange

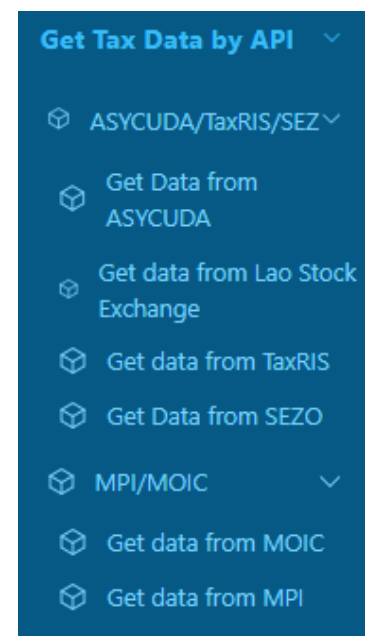

4.4.1.3 Get Data from TaxRIS

4.4.1.4 Get Data from SEZO

4.4.2 Get Data from MPI

4.4.2.1 Get Enterprise Data from MOIC

4.4.2.2 Get Enterprise Data from MPI

4.4.1 Get Data from ASYCUDA/TaxRIS/SEZ

4.4.1.1 Get Data from ASYCUDA

Below is the screen for Getting Data from ASYCUDA. Clicking button Get Data from API current nothing will happens, since the API from ASYCUDA is still not yet available. However, we can see the data structure that will be received from the Get Data from API.

The screenshot shows the TaxETS web application interface. The browser address bar indicates the URL is 34.27.243.31:8000/cms/get-data-asyncuda. The sidebar on the left contains the following navigation items:

- TaxETS
- System
- Data Dictionary
- Get Tax Data by Import from Excel
- Get Tax Data by API
 - ASYCUDA/TaxRIS/SEZ
 - Get Data from ASYCUDA
 - Get data from Lao Stock Exchange
 - Get data from TaxRIS
 - Get Data from SEZO
 - MPI/MOIC

The main content area is titled 'Get Data from ASYCUDA'. It includes a breadcrumb trail 'Dashboard » Get Data from ASYCUDA'. Below the title, there is a 'Browse Data' section with a search bar and a 'Get Data from API' button. The search bar contains the text 'Search...'. Below the search bar, there is a table header with the following columns:

NO	BORDER CODE	BORDER	TYPE OF CUSTOMS DECLARE	PROCESS TYPE	IMPORT DOCUMENT DATE	ASSESS DATE	TRYD RECEIPT DATE	TIN	IMPORT/EXPORT NAME	CUSTOMS DECLARE TIN	CUSTOMS DECLARE NAME	EXPORT COUNTRY CODE	DESTINAT COUNTRY CODE
----	-------------	--------	-------------------------	--------------	----------------------	-------------	-------------------	-----	--------------------	---------------------	----------------------	---------------------	-----------------------

The table is currently empty, showing '(Show ~ data from total 0 records)'. At the bottom right of the table, there is a pagination control showing 'Items per page: 10'.

4.4.1.2 Get Data from Lao Stock Exchange

Below is the screen for Getting Data from Lao Stock Exchange. Clicking button Get Data from API current nothing will happens, since the API from Lao Stock Exchange is still not yet available. However, we can see the data structure that will be received from the Get Data from API.

The screenshot displays the TaxETS web application interface. The browser's address bar indicates the URL: 34.27.243.31:8000/cms/get-data-from-lao-stock-exchange. The application's left sidebar, titled 'TaxETS', contains a navigation menu with the following items: 'System', 'Data Dictionary', 'Get Tax Data by Import from Excel', and 'Get Tax Data by API'. The 'Get Tax Data by API' section is expanded, showing a list of data sources: 'ASYCUDA/TaxRIS/SEZ', 'Get Data from ASYCUDA', 'Get data from Lao Stock Exchange' (which is currently selected), 'Get data from TaxRIS', 'Get Data from SEZO', and 'MPI/MOIC'. The main content area is titled 'Get data from Lao Stock Exchange' and includes a breadcrumb trail: 'Dashboard > Get data from Lao Stock Exchange'. Below the title, there is a 'Browse Data' section with a search bar and a 'Get Data from API' button. A table structure is displayed below the search bar, with columns labeled: 'IDS %', 'TIN %', 'DATE JOIN %', 'STATUS JOIN %', and 'ACTION'. The table is currently empty, with the text 'No data available' centered below the column headers. The bottom right of the table area shows 'Items per page: 10'.

4.4.1.3 Get Data from TaxRIS

Below is the screen for Getting Data from TaxRIS. Clicking button Get Data from API current nothing will happens, since the API from TaxRIS is still not yet available. However, we can see the data structure that will be received from the Get Data from API.

The screenshot shows a web browser window with the URL `34.27.243.31:8000/cms/get-data-from-taxris`. The page is titled "TaxETS" and has a sidebar with the following navigation items: System, Data Dictionary, Get Tax Data by Import from Excel, Get Tax Data by API (expanded), ASYCUDA/TaxRIS/SEZ, Get Data from ASYCUDA, Get data from Lao Stock Exchange, Get data from TaxRIS (selected), Get Data from SEZO, and MPI/MOIC. The main content area is titled "Get data from TaxRIS" and shows a "Browse Data" section with a search bar and a "Get Data from API" button. Below this is a table with the following columns: TIN %, ORGANISATION %, YEAR %, REVENUE %, EXPENSE %, PROFIT %, TE DUMMY %, RATE PAID %, TOTAL ASSETS %, and ACTION. The table is currently empty, displaying "No data available". The page also shows a breadcrumb "Dashboard » Get data from TaxRIS" and a footer "Items per page: 10".

TIN %	ORGANISATION %	YEAR %	REVENUE %	EXPENSE %	PROFIT %	TE DUMMY %	RATE PAID %	TOTAL ASSETS %	ACTION
No data available									

4.4.1.4 Get Data from SEZO

Below is the screen for Getting Data from SEZO. Clicking button Get Data from API current nothing will happens, since the API from SEZO is still not yet available. However, we can see the data structure that will be received from the Get Data from API.

The screenshot displays the TaxETS web application interface. The browser's address bar indicates the URL is `34.27.243.31:8000/cms/get-data-from-sezo`. The application's left sidebar features a menu with the following items: **TaxETS**, **System**, **Data Dictionary**, **Get Tax Data by Import from Excel**, **Get Tax Data by API** (which is expanded to show sub-options), and **ASYCUDA/TaxRIS/SEZO** (the currently selected option). The sub-options under 'Get Tax Data by API' include 'Get Data from ASYCUDA', 'Get data from Lao Stock Exchange', 'Get data from TaxRIS', 'Get Data from SEZO' (highlighted in blue), and 'MPI/MOIC'. The main content area is titled 'Get data from SEZO' and contains a 'Browse Data' section. This section includes a search bar and a blue button labeled 'Get Data from API'. Below the search bar, a message states '(Show ~ data from total 0 records)'. A table is displayed with the following columns: NO, TIN, LICENSE DATE, PROVINCE, DISTRICT, SECTOR, MAIN BUSINESS CATEGORY, INVESTORS, STATUS, and ACTION. The table is currently empty, with the text 'No data available' centered below the column headers. At the bottom right of the table area, there is a dropdown menu for 'Items per page' set to '10'.

4.4.2 Get Data from MOIC/MPI

4.4.2.1 Get Data from MOIC

Below is the screen for Getting Data from MOIC. Clicking button Get Data from API current nothing will happens, since the API from MOIC is still not yet available. However, we can see the data structure that will be received from the Get Data from API.

The screenshot displays the 'Get data from MOIC' interface within the TaxETS system. The browser's address bar indicates the URL '34.27.243.31:8000/cms/get-data-from-moic'. The left-hand navigation menu is expanded, showing options under 'Get Tax Data by API', including 'ASYCUDA/TaxRIS/SEZ', 'MPI/MOIC' (which is further expanded to show 'Get data from MOIC' and 'Get data from MPI'), 'Run Tax Expenditure', and 'Report'. The main content area features a header 'Get data from MOIC' and a breadcrumb trail 'Dashboard » Get data from MOIC'. Below this, there is a 'Browse Data' section with a search bar and a prominent blue button labeled 'Get Data from API'. A table is presented below, detailing the expected data structure with columns: ID, TIN, COMPANY NAME, ENTERPRISE TYPE, DATE OF REGISTRATION LICENSE, STATUS ACTIVE, REGISTERED CAPITAL, REGISTERED BUSINESS CAPITAL (LAK), ACTIVITY CODES OF BUSINESS, LOCATION OF BUSINESS, and ACTION. The table currently displays 'No data available'. The bottom right corner of the interface shows 'Items per page: 10'.

4.4.2.2 Get Data from MPI

Below is the screen for Getting Data from MPI. Clicking button Get Data from API current nothing will happens, since the API from MPI is still not yet available. However, we can see the data structure that will be received from the Get Data from API.

The screenshot displays the 'Get data from MPI' interface within the TaxETS application. The browser address bar shows the URL '34.27.243.31:8000/cms/get-data-from-mpi-api'. The left sidebar contains the following navigation items: System, Data Dictionary, Get Tax Data by Import from Excel, Get Tax Data by API (expanded), ASVCUDA/TaxRIS/SEZ, MPI/MOIC (expanded), Get data from MOIC, Get data from MPI, and Run Tax Expenditure. The main content area is titled 'Get data from MPI' and includes a breadcrumb 'Dashboard » Get data from MPI'. Below the title is a 'Browse Data' section with a search bar and a 'Get Data from API' button. A table is shown with the following headers: NO, TIN, NAME OF PROJECTS GRANTED BY MPI, DATE OF INVESTMENT LICENSE, ACTIVITIES, INCENTIVES AS OUTLINED IN THE AGREEMENT SIGNED WITH MPI, and ACTION. The table body contains the text 'No data available'. The bottom right of the table area shows 'Items per page: 10'.

4.5 Run Tax Expenditure

This Part is to initiate the Backend function to run all types of Tax Expenditure in a single function.

4.6 Report

After the calculation of TE in previous stage, now user can see various reports on the screen or print out on the paper. All reports are mostly the same as implemented in MS Excel Prototype developed by Local Expert with some additions. The TE Reports are:

- TE by Tax Type
- TE by Sector
- TE by Location (Province)
- TE by Tax Type (% of GDP)
- TE by Tax Type (% of Revenue)
- Profit Tax TE by Provision
- Individual Income Tax TE by Provision
- VAT TE by Provision
- Excise Tax TE by Provision
- Customs Duty TE by Provision
- Non-Tax TE by Provision

Note: The data shown currently in different reports mainly are still sample data, not accurate and not comprehensive. The real data from Local Expert will be imported and shown in the next version.

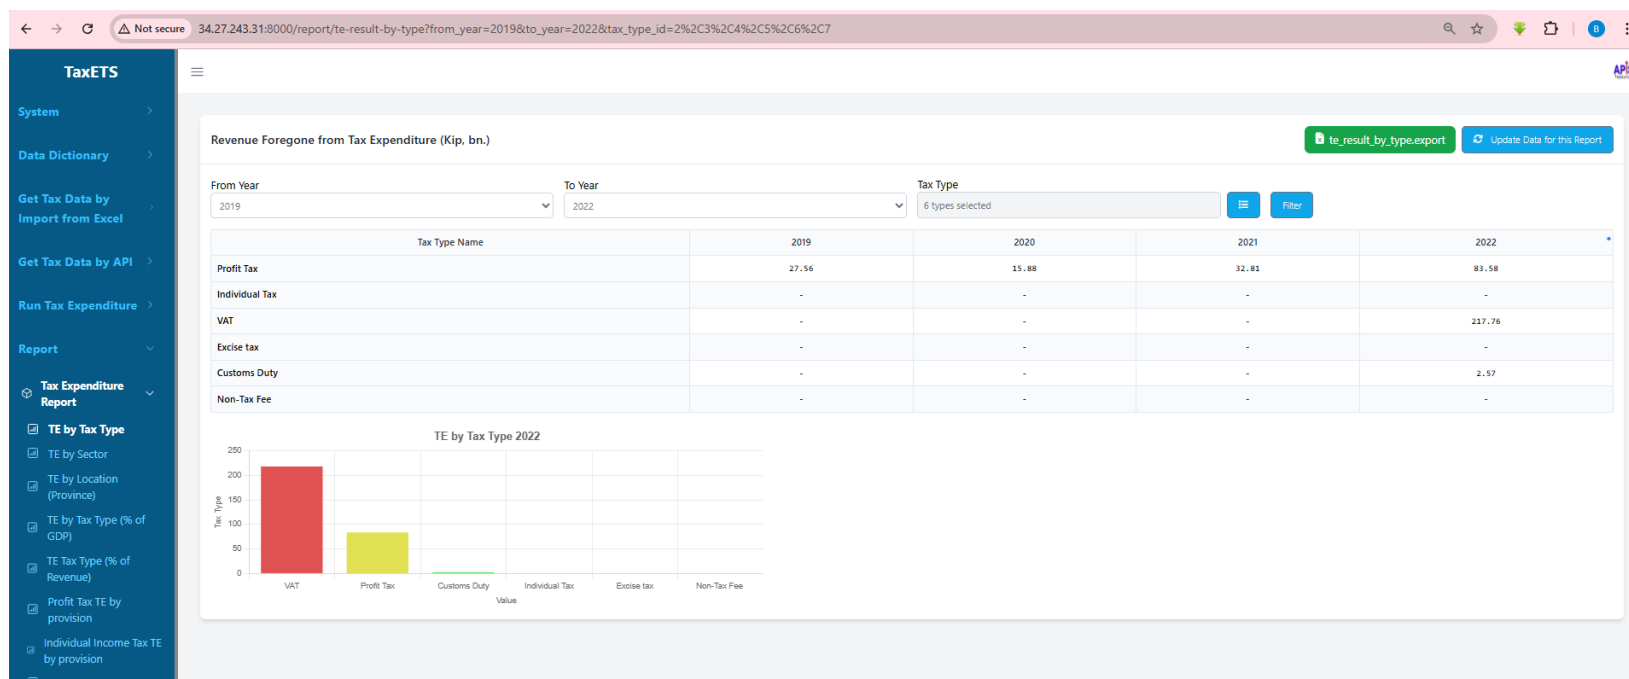

4.6.1 Tax Expenditure Report

This report shows the Tax Expenditure classified or grouped by Tax Type such as Profit Tax, Individual Tax, VAT, Excise Tax, Customs Duty and Non-Tax Fee. Report can be seen with a kind of comparison in time series, namely year by year, that can be selected by user. Report provides both tabular format and graphical presentation

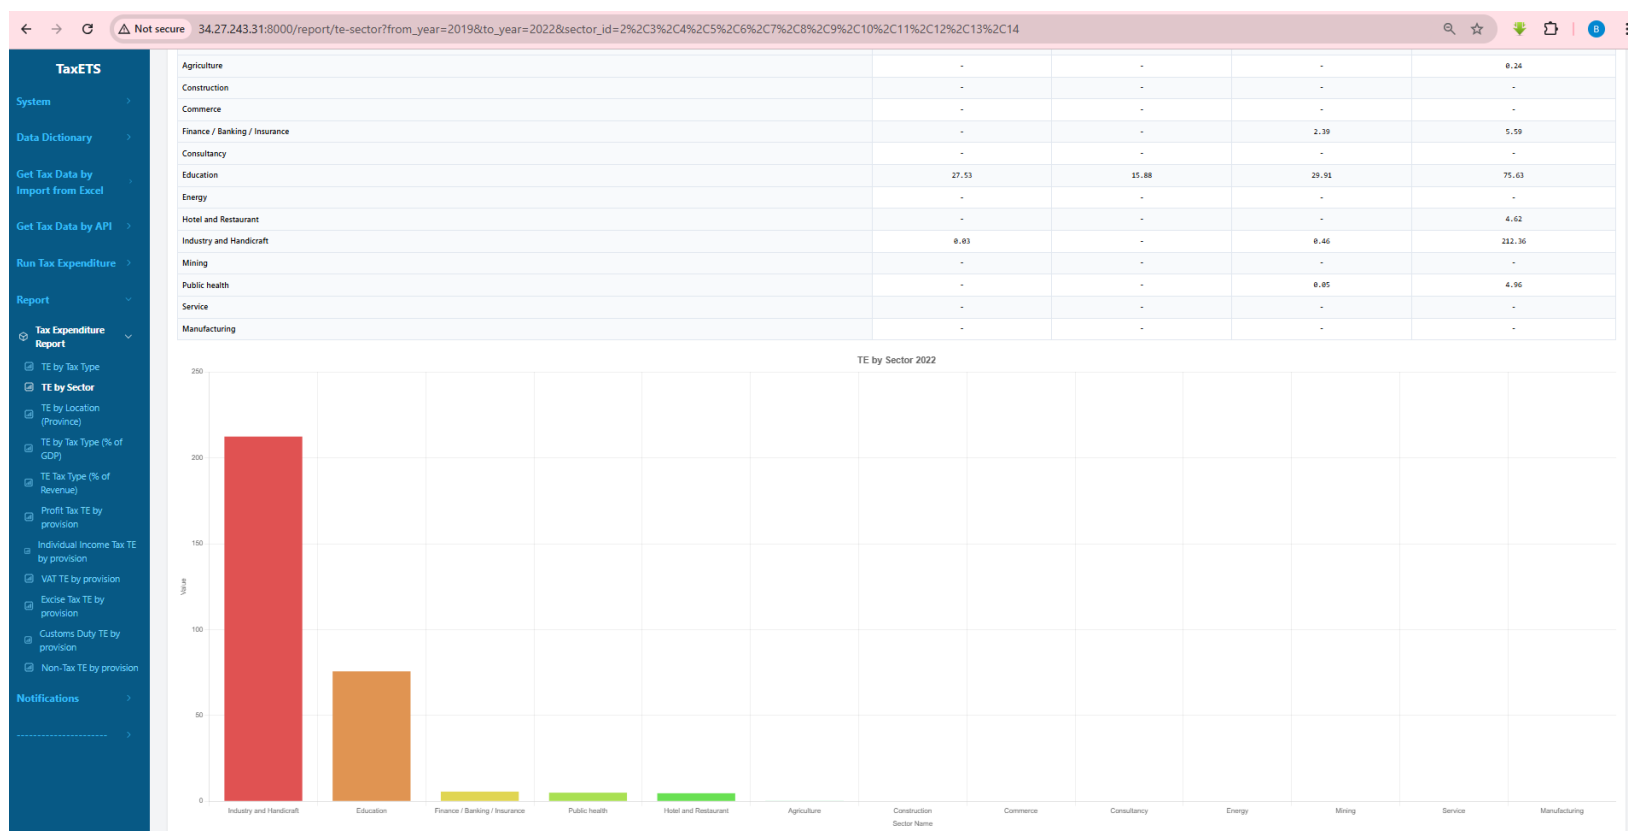

4.6.1.1 TE by Tax Type

This report shows the Tax Expenditure by Tax Type. Report demonstrates the figures year by year, that can be selected by user. Currently the graphic shows only 2 dimensions, e.g. TE by Tax Type for the last year selected. The final version will show the also graphical output for all years selected as well.

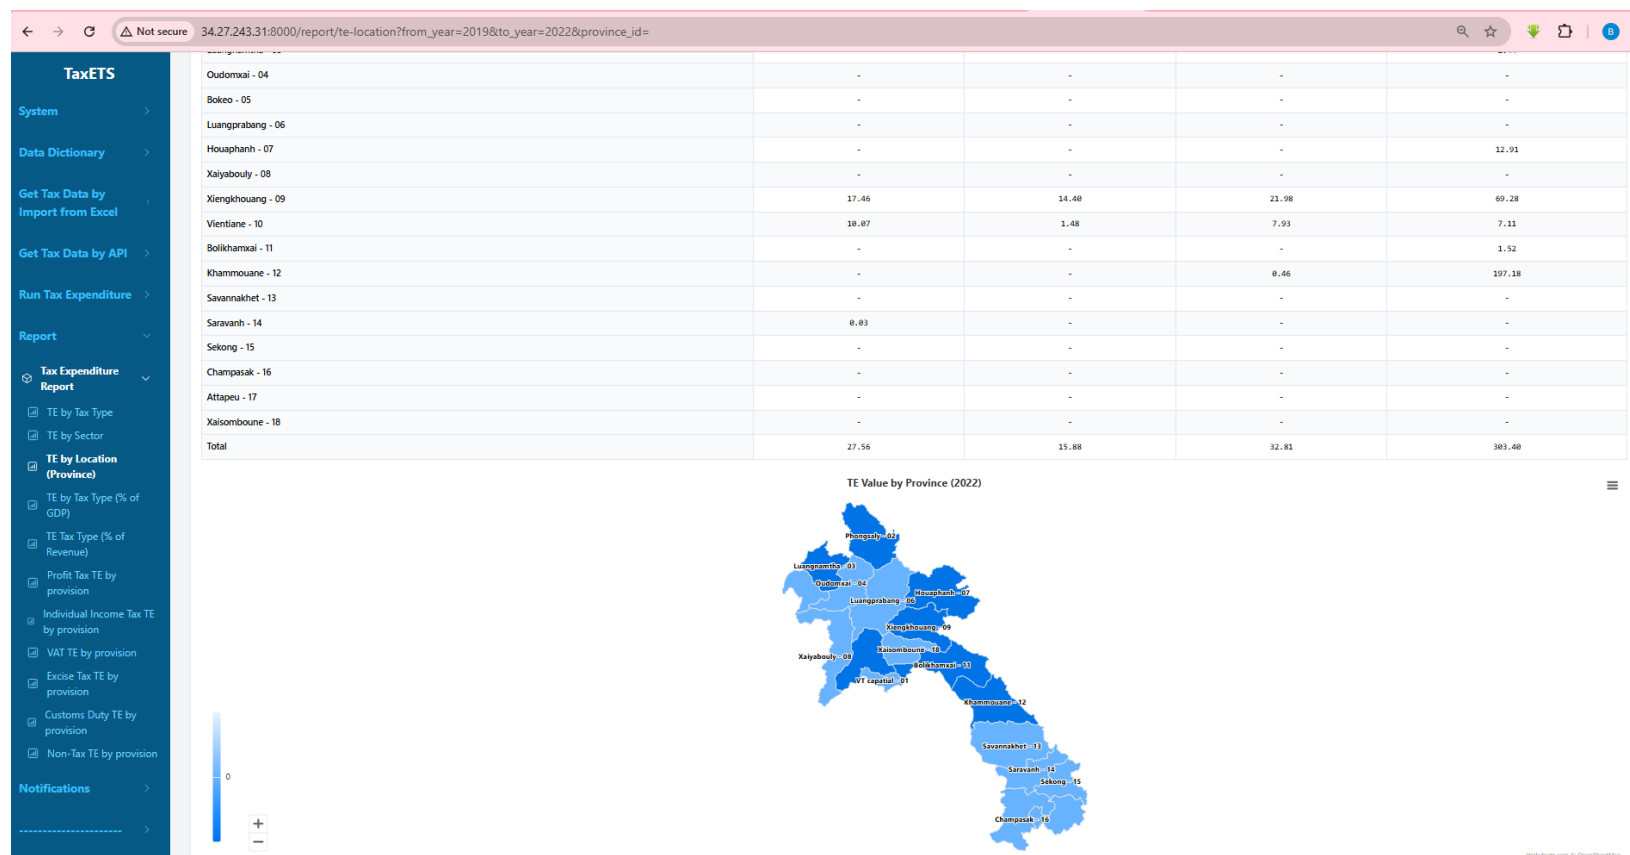

4.6.1.2 TE by Sector

This report shows the Tax Expenditure by Sector. Report demonstrates the figures year by year, that can be selected by user. Currently the graphic shows only 2 dimensions, e.g. TE by Sector for the last year selected. The final version will show the also graphical output for all years selected as well.

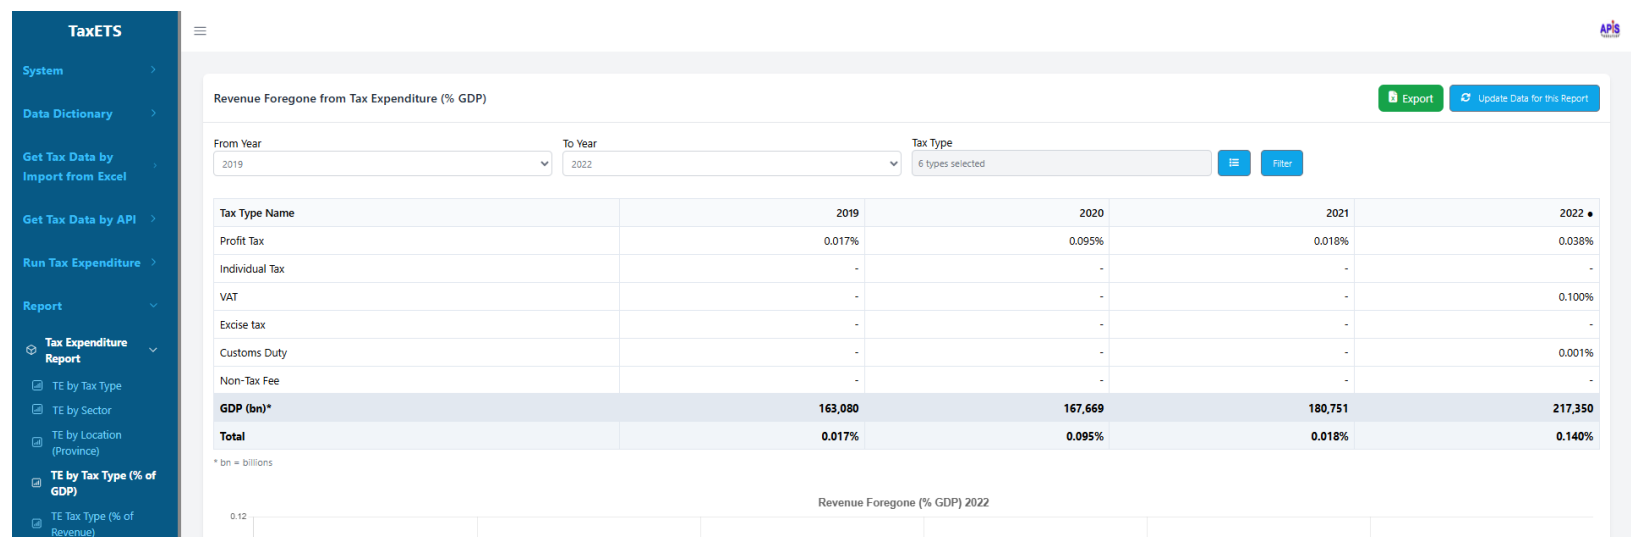

4.6.1.3 TE by Location (Province)

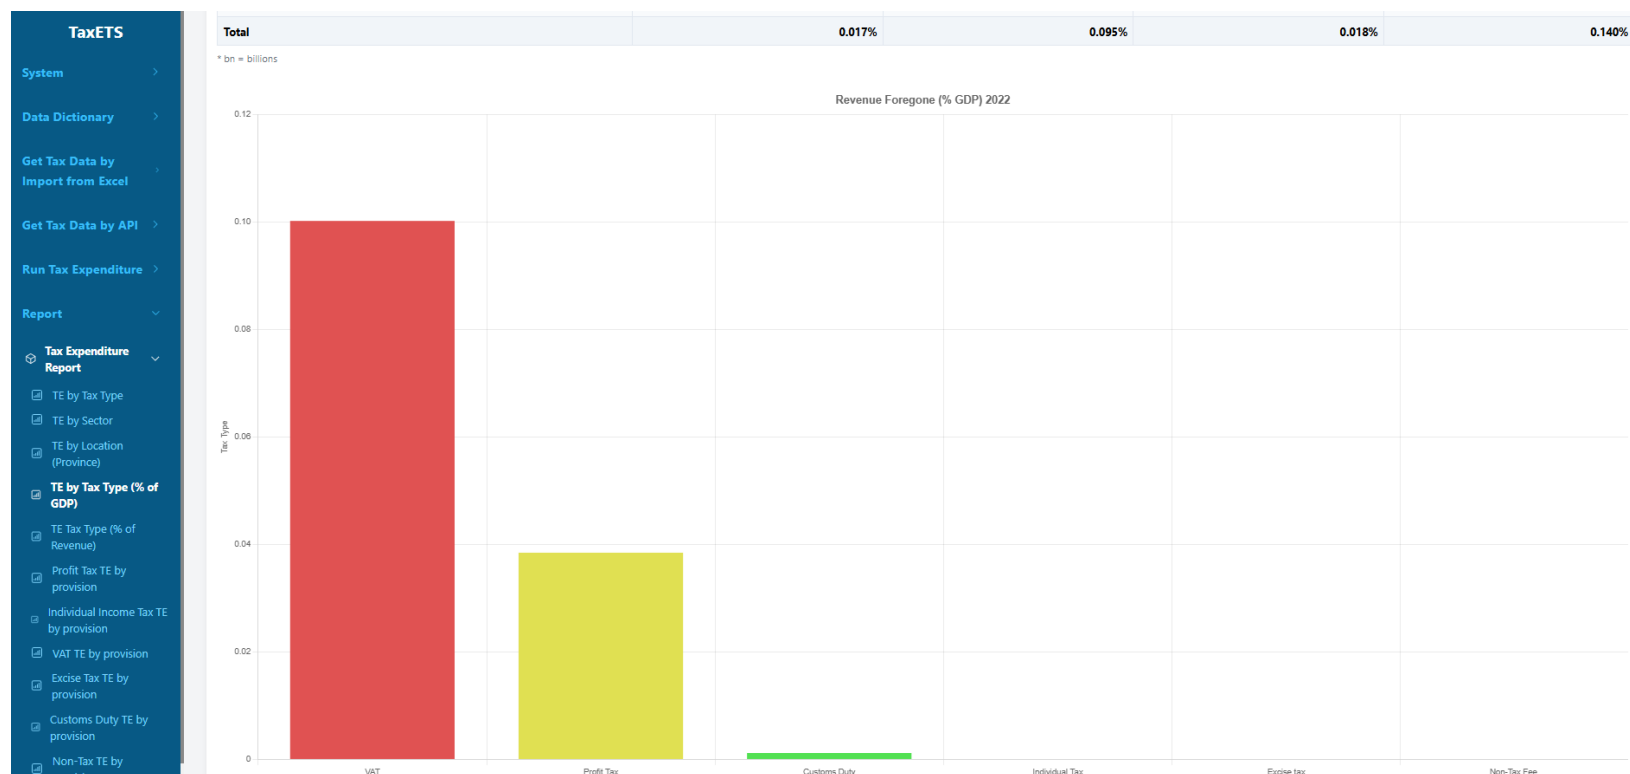

This report shows the Tax Expenditure by Location (Province). Report demonstrates the figures year by year, that can be selected by user. The graphic shows the color intensity level depending on the TE by Location (Province) for the last year selected. The final version will show the also graphical output for all years selected as well. The color intensity variation will be needed also to improved.

4.6.1.4 TE by Tax Type (% of GDP)

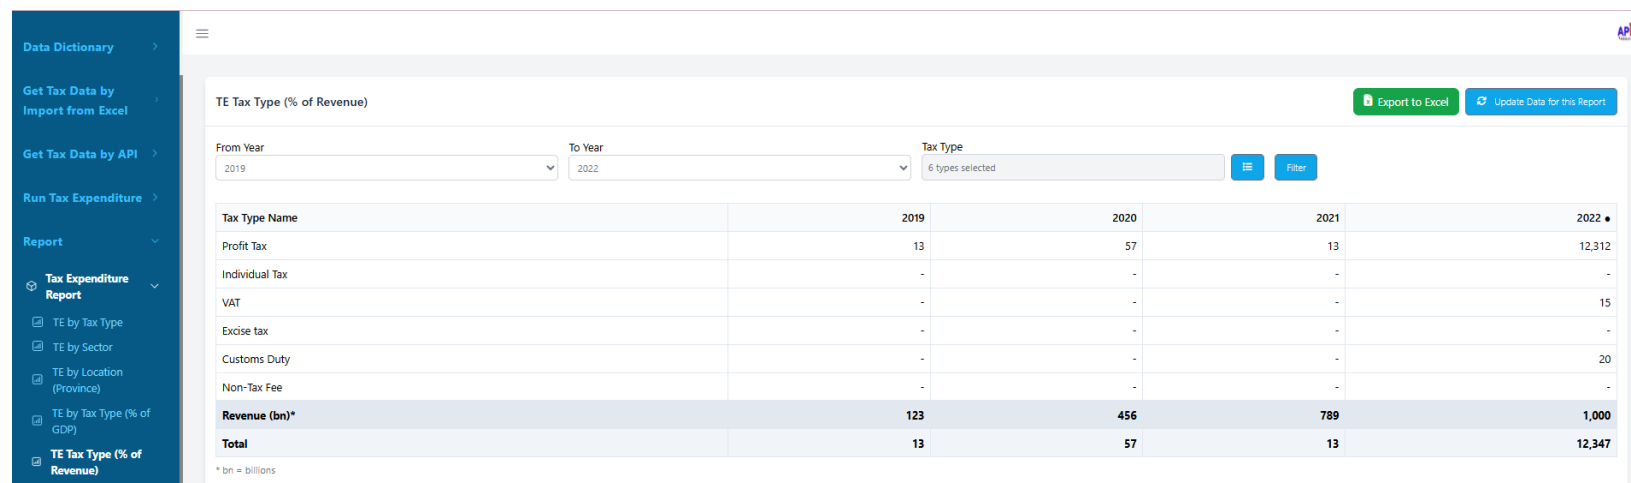

This report shows the Tax Expenditure by Tax Type (% of GDP). Report demonstrates the figures year by year, that can be selected by user. Currently the graphic shows only 2 dimensions, e.g. TE by Tax Type (% of GDP) for the last year selected. The final version will show the also graphical output for all years selected as well.

4.6.1.5 TE by Tax Type (% of Revenue)

This report shows the Tax Expenditure by Tax Type (% of Revenue). Report demonstrates the figures year by year, that can be selected by user. Currently the graphic shows only 2 dimensions, e.g. TE by Tax Type (% of Revenue) for the last year selected. The final version will show the also graphical output for all years selected as well.

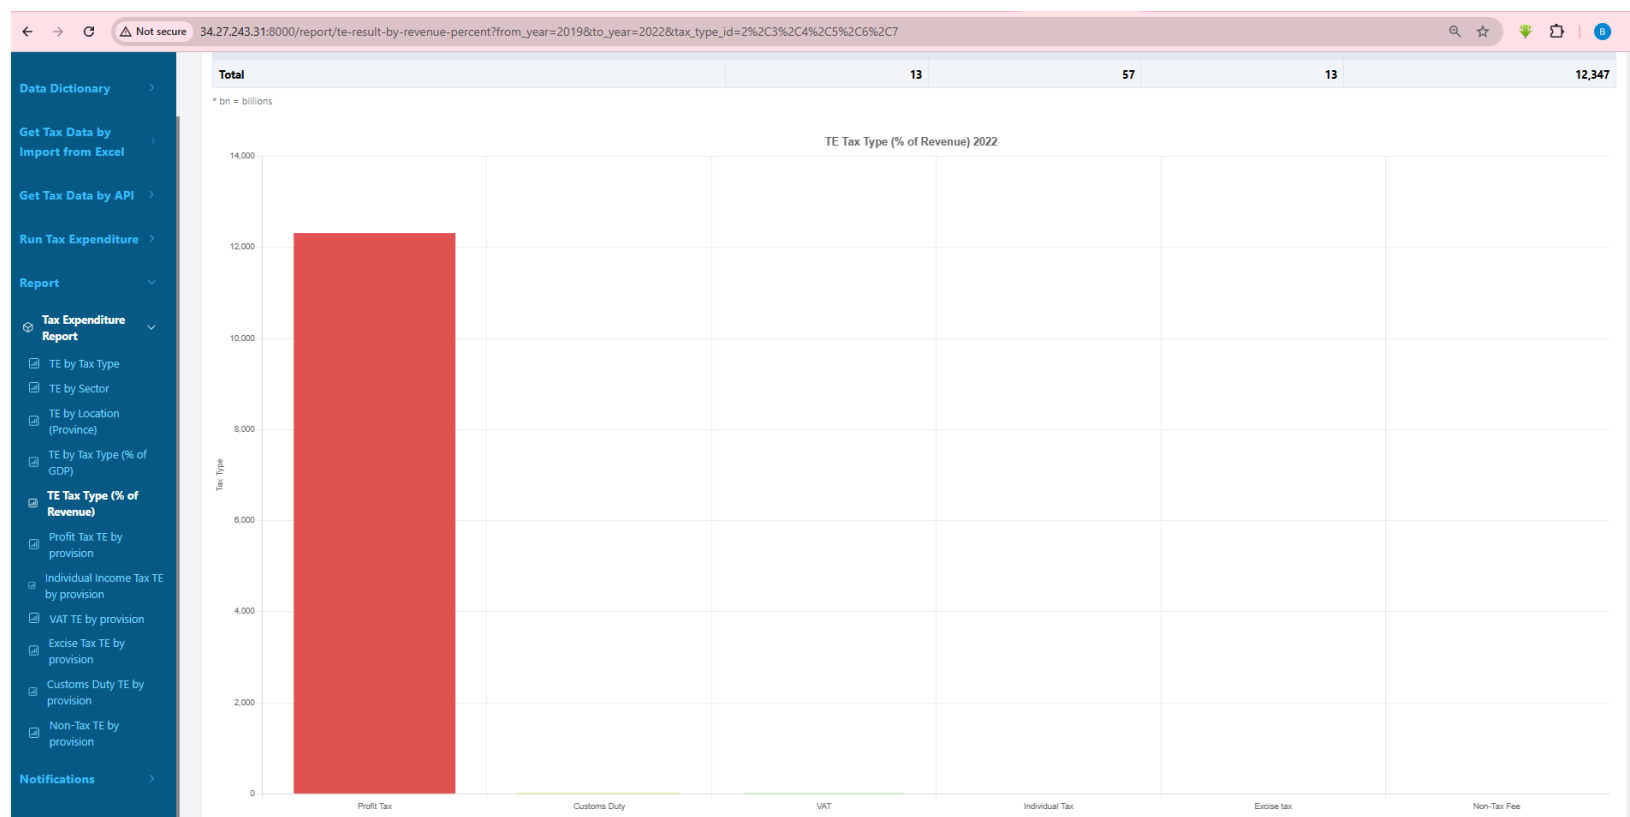

TE Tax Type (% of Revenue)

From Year: 2019 To Year: 2022 Tax Type: 6 types selected

Export to Excel Update Data for this Report

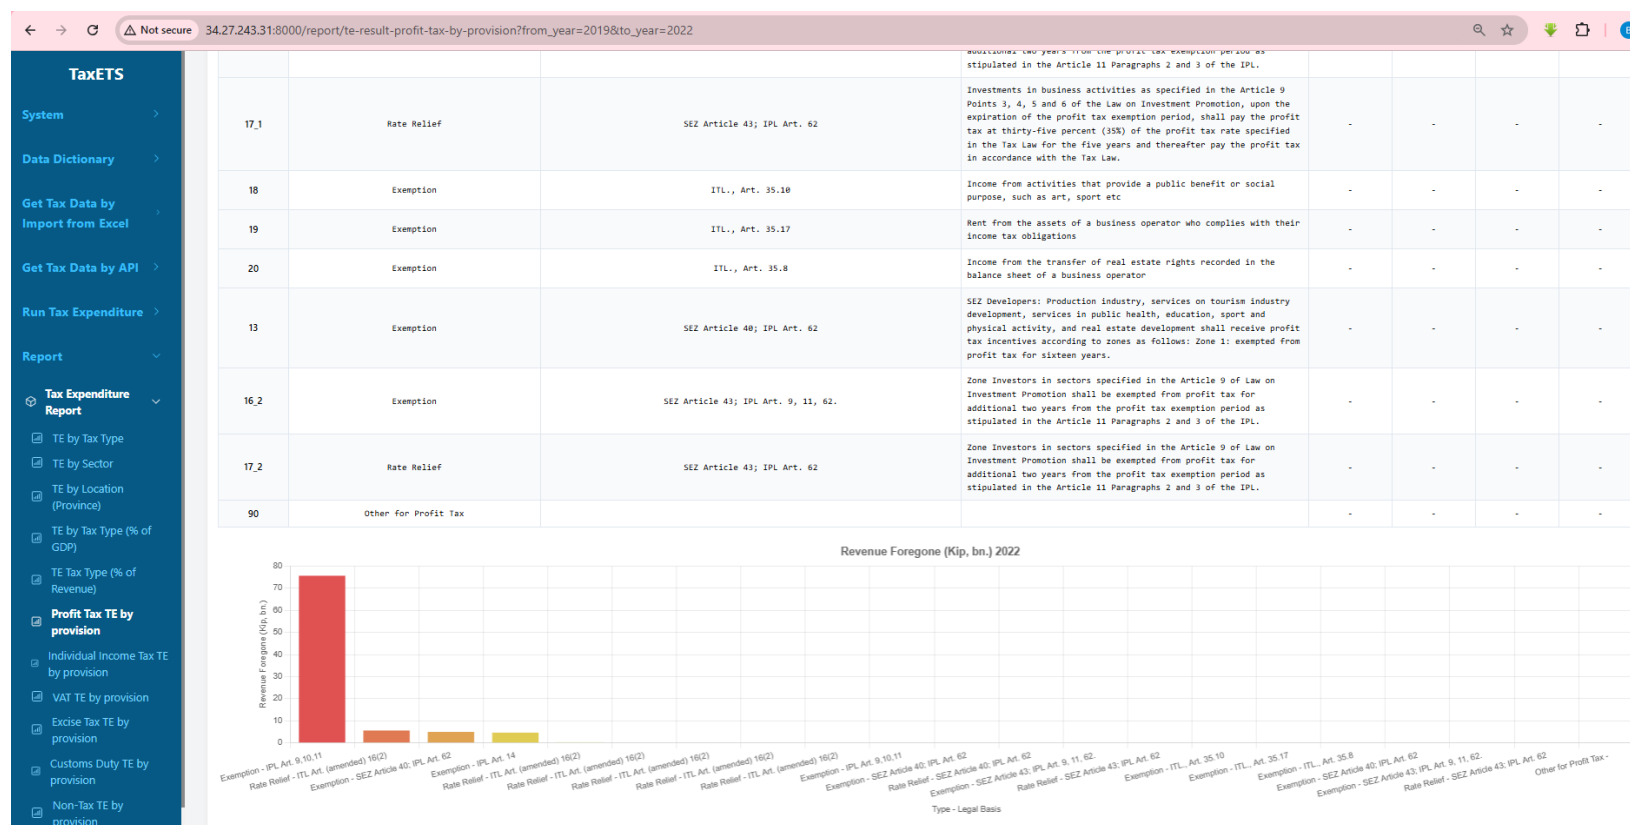

Tax Type Name	2019	2020	2021	2022
Profit Tax	13	57	13	12,312
Individual Tax	-	-	-	-
VAT	-	-	-	15
Excise tax	-	-	-	-
Customs Duty	-	-	-	20
Non-Tax Fee	-	-	-	-
Revenue (bn)*	123	456	789	1,000
Total	13	57	13	12,347

* bn = billions

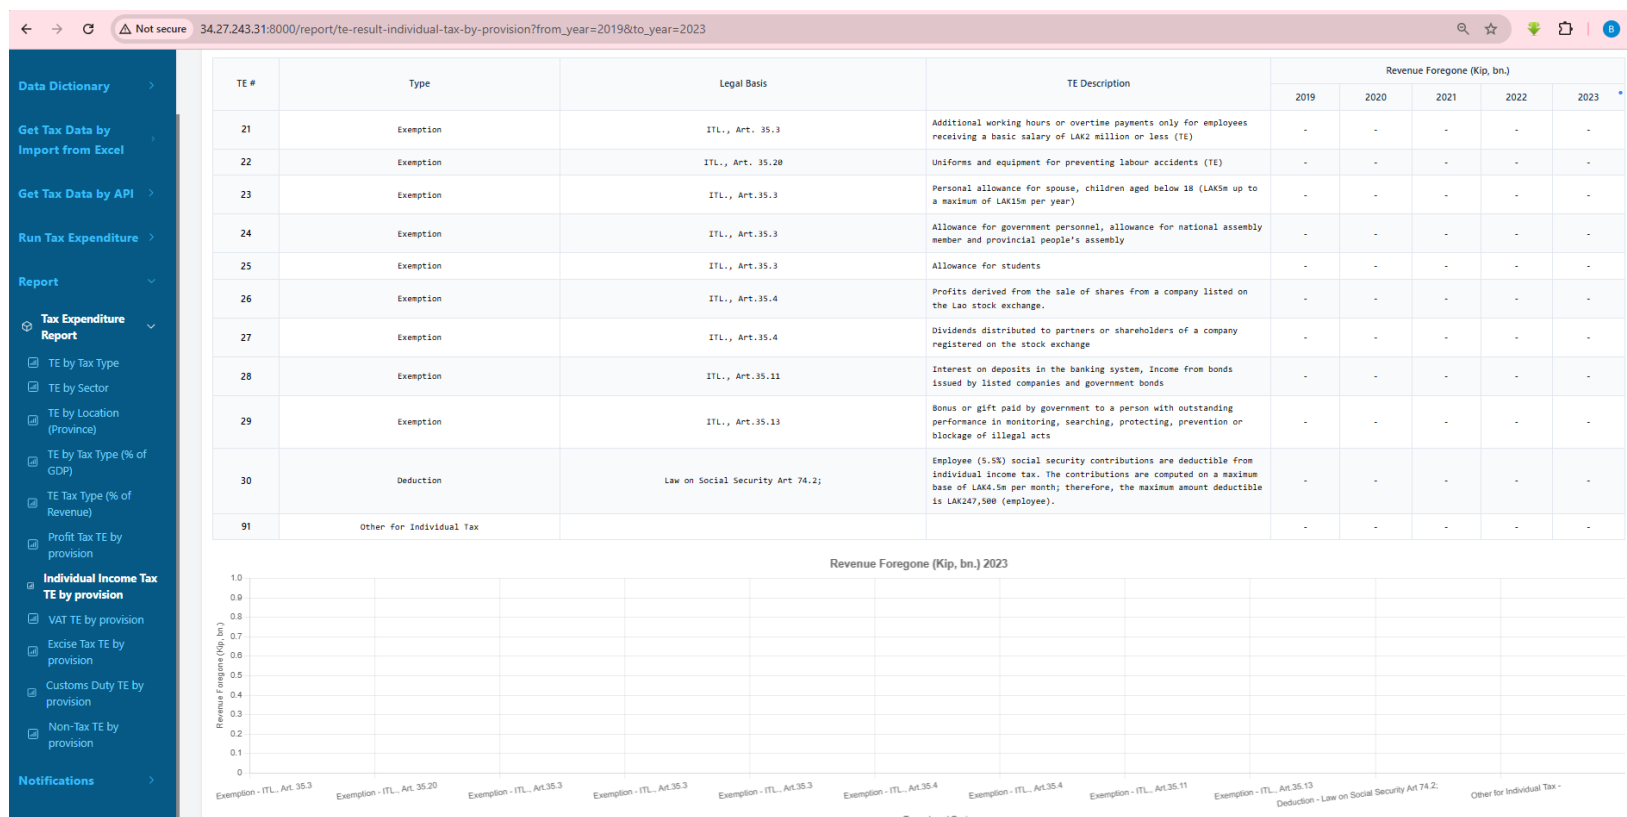

4.6.1.6 Profit Tax TE by Provision

This report shows Profit Tax TE by Provision and demonstrates the figures year by year, that can be selected by user. Currently the graphic shows only 2 dimensions, e.g. Profit Tax TE by Provision for the last year selected. The final version will show the also graphical output for all years selected as well.

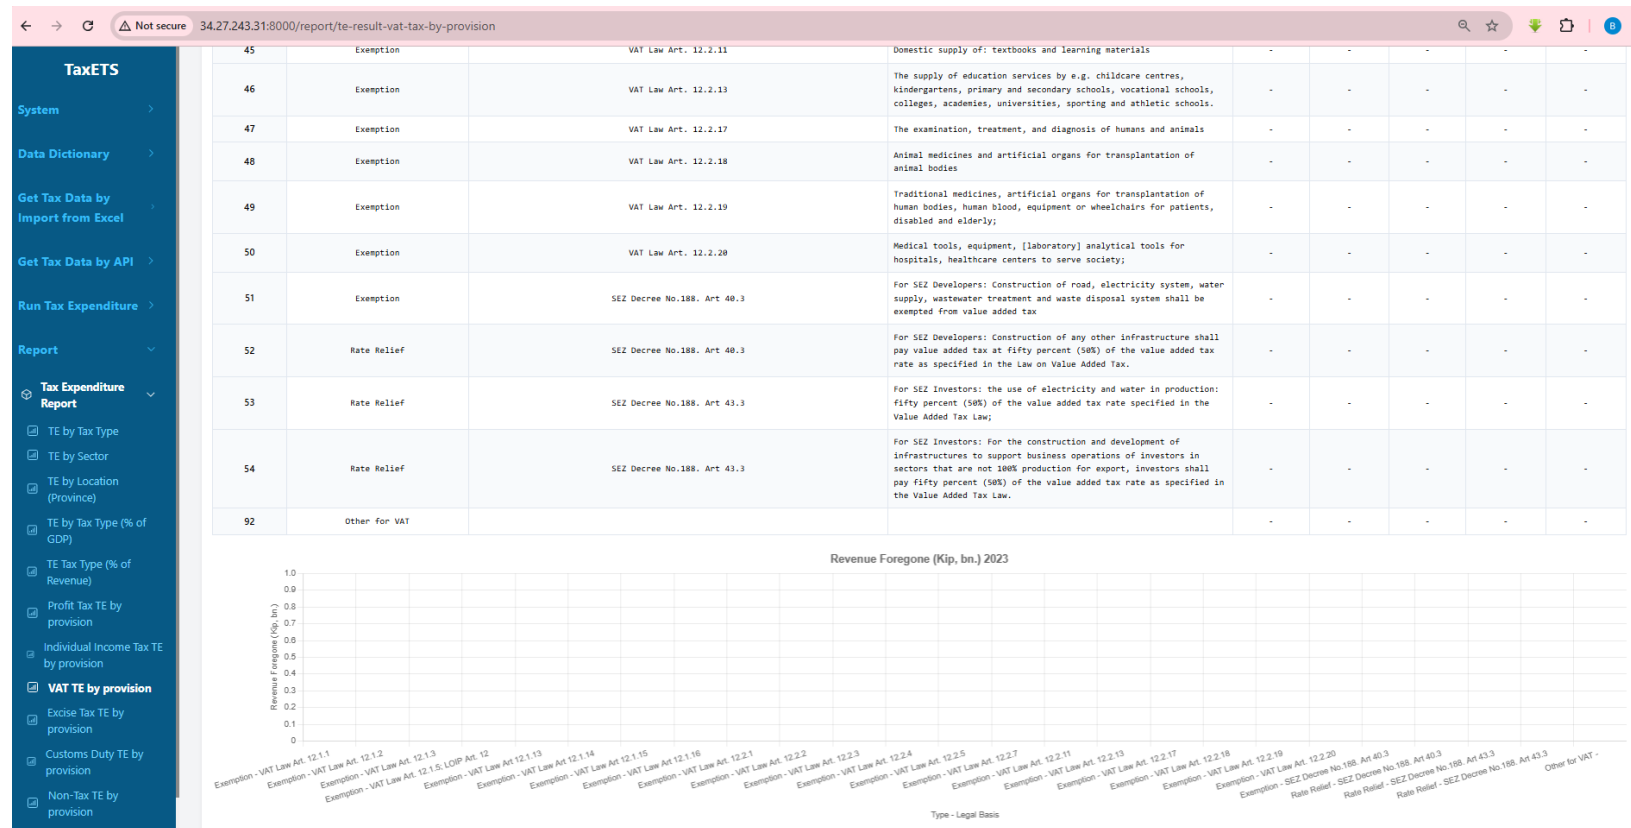

4.6.1.7 Individual Income Tax TE by Provision

This report shows Individual Income Tax TE by Provision and demonstrates the figures year by year, that can be selected by user. Currently the graphic shows only 2 dimensions, e.g. Individual Income Tax TE by Provision for the last year selected. The final version will show the also graphical output for all years selected as well.

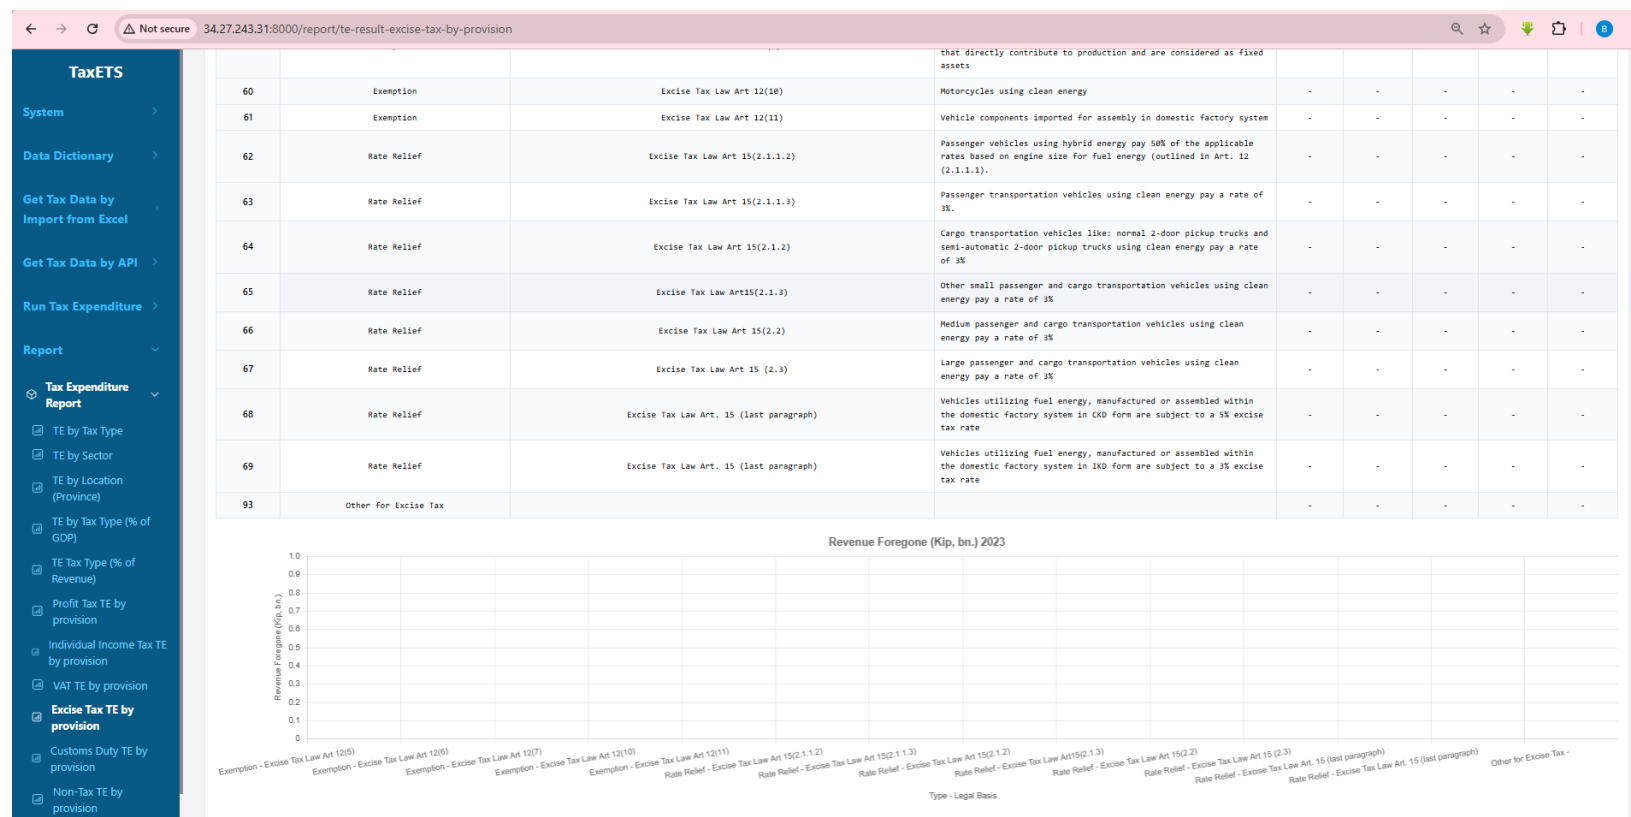

4.6.1.8 VAT TE by Provision

This report shows VAT TE by Provision and demonstrates the figures year by year, that can be selected by user. Currently the graphic shows only 2 dimensions, e.g. VAT TE by Provision for the last year selected. The final version will show the also graphical output for all years selected as well.

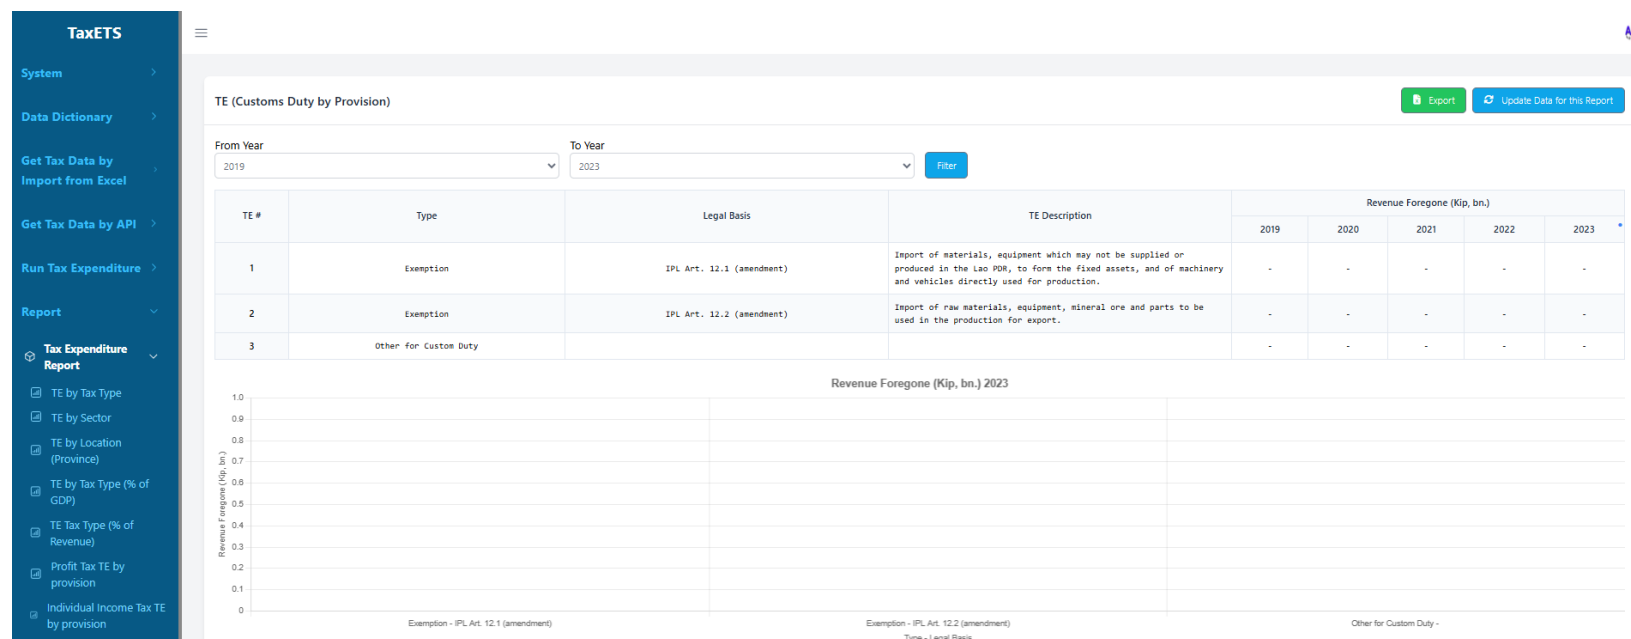

4.6.1.9 Excise Tax TE by provision

This report shows Excise Tax TE by Provision and demonstrates the figures year by year, that can be selected by user. Currently the graphic shows only 2 dimensions, e.g. Excise Tax TE by Provision for the last year selected. The final version will show the also graphical output for all years selected as well.

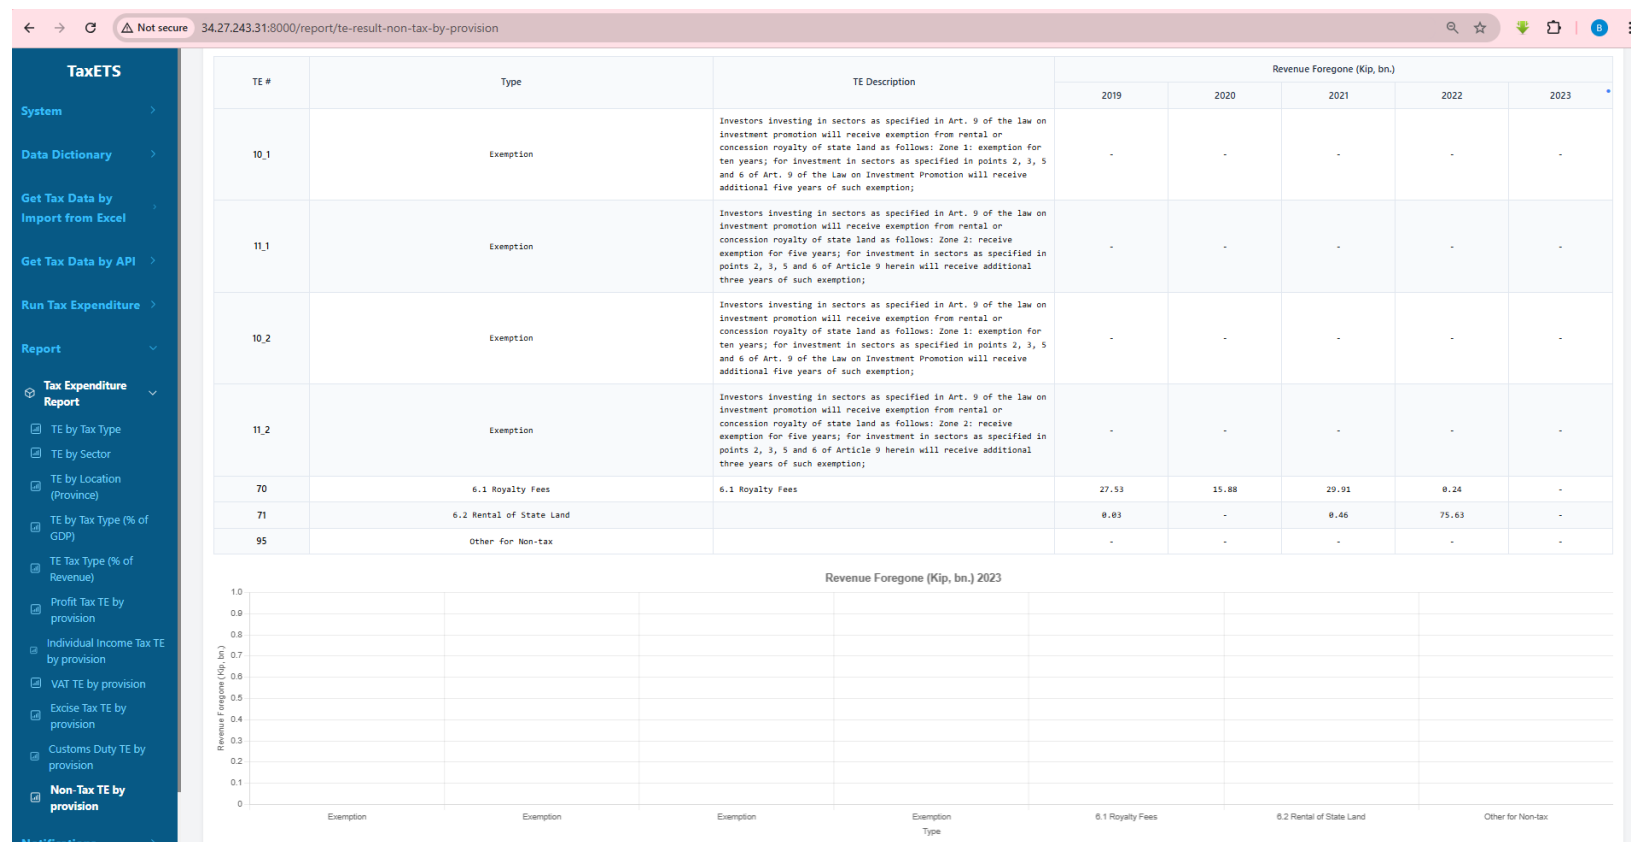

4.6.1.10 Customs Duty TE by provision

This report shows Customs Duty TE by Provision and demonstrates the figures year by year, that can be selected by user. Currently the graphic shows only 2 dimensions, e.g. Customs Duty Tax TE by Provision for the last year selected. The final version will show the also graphical output for all years selected as well.

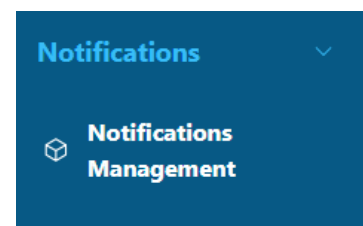

4.6.1.11 Non-Tax TE by provision

This report shows Non-Tax TE by Provision and demonstrates the figures year by year, that can be selected by user. Currently the graphic shows only 2 dimensions, e.g. Non-Tax TE by Provision for the last year selected. The final version will show the also graphical output for all years selected as well.

4.7 Notifications

Currently we have implemented the Notification Management Interface. This interface is for the management of function to notify stakeholders, such as setup E-mail Address, Phone Number and initiate the action (send e-mail, or send SMS to the phone) for a particular project.

In the final version, we will implement the Notification System, the functionality of which includes following details, that depends on Investment sector: agriculture, SEZ, Mining, Energy, and PPP

• Agriculture / SEZ

Descriptions	Deadlines	Responsible sector/Stake Holder	MOU	CA / SEZ PDA
- MOU - Deposit money - Return deposit money - Reporting reminders. - Renewal MOU deadlines (if applicable).			✓ ✓ ✓ ✓ ✓	
- CA - Deposit money - Return deposit money deadline. - Reporting reminders. - Renewal CA deadlines (if applicable). - Concession fee - Incentives				✓ ✓ ✓ ✓ ✓ ✓ ✓

• Mining

Descriptions	Deadlines	Responsible sector	Prospecting and Exploration Agreement	Mining Development Agreement
Prospecting end date reminders.			✓	

▪ Exploration end date reminders. ▪ FS end date reminders. ▪ Deposit money ▪ Return deposit money deadline. ▪ Concession fee ▪ Reporting reminders. ▪ Renewal agreement deadlines (if applicable).			✓ ✓ ✓ ✓ ✓ ✓ ✓	
▪ Mining development agreement ▪ Deposit money ▪ Return deposit money deadline. ▪ Reporting reminders. ▪ Renewal agreement deadlines (if applicable). ▪ Concession fee ▪ Incentives				✓ ✓ ✓ ✓ ✓ ✓ ✓

• Energy

Descriptions	Deadlines	Responsible sector	MOU	PDA	CA
▪ MOU ▪ Deposit money ▪ Return deposit money ▪ Reporting reminders. ▪ Renewal MOU deadlines (if applicable).			✓ ✓ ✓ ✓ ✓		
▪ PDA ▪ Deposit money ▪ Return deposit money ▪ Reporting reminders. ▪ Renewal PDA deadlines (if applicable).				✓ ✓ ✓ ✓ ✓	

▪ CA					✓
▪ Deposit money					✓
▪ Return deposit money deadline.					✓
▪ Reporting reminders.					✓
▪ Renewal CA deadlines (if applicable).					✓
▪ Concession fee					✓
▪ Incentives					✓

• PPP

Descriptions	Deadlines	Responsible sector	MOU	CA

We will have 3 Interfaces that user will work with:

1. List of Investment Projects grouped or classified by Responsible stakeholder: such as MPI, MoF, National Treasury, etc.
2. List of Investment Projects grouped or classified by Agreement type: MOU, PDA, CA or specific procedures, and
3. List of Investment Projects grouped or classified by Financial Obligation: Deposit of guaranty funds, concession fees, royalty fees, and incentives.

4.7.1 Notification Management

This part is to manage the Notification Record, such as Notification ID, Stakeholder Source, Content, Date of Notification, Email to be notified, Phone Number for SMS Notification, and Status of Notification. User and Start/Run Notification, View, Edit or Delete certain Notification Item.

The screenshot shows the 'TaxETS' web application interface. The left sidebar contains a navigation menu with the following items: System, Common Data Dictionary, Tax Data Dictionary, Get Tax Data by API, Get Tax Data by Import from Excel, Run Tax Expenditure, Report, Notifications, Notifications Management (selected), Delivery Management, Notification parameters Configuration, and Help. The main content area is titled 'Notifications' and includes a 'Browse Data' section with a search bar and an 'Add New' button. Below this is a table with the following columns: ID, NOTIFICATION ID, STACKHOLDER SOURCE, CONTENTS, NOTIFICATION DATETIME, EMAILS, PHONES, STATUS, and ACTION. The table displays two records. The first record has ID 182, NOTIFICATION ID 123, STACKHOLDER SOURCE MOF Lao, CONTENTS 'TIN: 123 -- Rule:5 -- Value Profit: 100,000,000.00Rate Relief :13%-- Incentives Period Time: 48 -- Tax incentives will Expires in (months): 48.00 -- Profit TaxAmountBenchmark: 13,000,000.00', NOTIFICATION DATETIME 01/10/2024 00:00:00, EMAILS nguyenvancuong4778@gmail.com, PHONES, STATUS Unsent, and ACTION buttons (play, refresh, eye, edit, delete). The second record has ID 181, NOTIFICATION ID 123, STACKHOLDER SOURCE MOF Lao, CONTENTS 'TIN: 123 -- Rule:2 -- Value Profit: 100,000,000.00Rate Relief :5%-- Incentives Period Time: 36 -- Tax incentives will Expires in (months): 27.00 -- Profit TaxAmountBenchmark: 5,000,000.00', NOTIFICATION DATETIME 01/10/2024 00:00:00, EMAILS nguyenvancuong4778@gmail.com, PHONES, STATUS Unsent, and ACTION buttons (play, refresh, eye, edit, delete). The bottom right of the table shows 'Items per page: 10'.

ID	NOTIFICATION ID	STACKHOLDER SOURCE	CONTENTS	NOTIFICATION DATETIME	EMAILS	PHONES	STATUS	ACTION
182	123	MOF Lao	TIN: 123 -- Rule:5 -- Value Profit: 100,000,000.00Rate Relief :13%-- Incentives Period Time: 48 -- Tax incentives will Expires in (months): 48.00 -- Profit TaxAmountBenchmark: 13,000,000.00	01/10/2024 00:00:00	nguyenvancuong4778@gmail.com		Unsent	[Play] [Refresh] [Eye] [Edit] [Delete]
181	123	MOF Lao	TIN: 123 -- Rule:2 -- Value Profit: 100,000,000.00Rate Relief :5%-- Incentives Period Time: 36 -- Tax incentives will Expires in (months): 27.00 -- Profit TaxAmountBenchmark: 5,000,000.00	01/10/2024 00:00:00	nguyenvancuong4778@gmail.com		Unsent	[Play] [Refresh] [Eye] [Edit] [Delete]

5 Summary of Development Status

- All core functional modules have been developed according latest revision
- Initial user interface is deployed on internal testing server
- Stakeholder demo and feedback workshop scheduled

Pending for next deliverable:

- Finalize Application with all pending implementation mentioned in previous section, and deliver as version 3:
 - Module 2: Data Dictionary, Non-Tax Benchmark need to be editable.
 - All reports with Graphics need to be shown in kind of 3 dimensional, e.g. show bars with different pattern or colors for different years.
 - Implement the Notification for Invest Projects.
- User feedback collection and adjustment.
- Preparing User Manual for both End User and Admin Users.
- Final user training and documentation.
- Deployment and Go-Live.

6 Conclusion and Way Forward

Despite the shift in implementation strategy, the TaxETS development is proceeding on track. The system is already functionally sound, user-friendly, and prepared for future scale-up and integration.

We acknowledge the FPD, Local Expert, and UNDP for their guidance and decision-making agility in adjusting the implementation plan to match practical realities. The system remains flexible and aligned with long-term policy objectives for tax governance and fiscal transparency.

The next steps will include extensive testing, operational guideline finalization, user training, and full deployment by the end of June 2025.
